CONCILIS		

INTRODUCTION

The following paper was written in an attempt to acquaint the logging truck operator with the Oregon Motor Vehicle Laws and the Motor Transportation Code of Oregon.

In many instances operators are fined or have their Public

Utilities Licenses revoked due to noncompliance with Motor Vehicle Laws

or the Motor Transportation Code. In many cases the lack of compli
ance of the operator arises from an attitude of nonconformance on his

part. However, in numerous cases the lack of operator conformance to

the laws arises from his limited knowledge of the particular situations

which arise.

It is the writer's intent to attempt to clarify and combine those laws pertaining to log hauling only, where a public highway must be traversed in transporting logs from the woods to the site of utilization.

The laws contained in this paper are in effect at the present time and will continue to be until the next session of the Oregon State Legislature. The laws are subject to change by each session of the legislature. It is therefore suggested that the offices of the Secretary of State and Public Utilities Commissioner be referred to for additional information and any changes occurring after the writing of this paper.

All material contained in this paper was compiled in accordance with the offices of the Secretary of State and Public Utilities Commissioner.

PROCEDURE

Effective January 1, 1948, all special carriers operating in the State of Oregon must be reclassified as either common, contract or private carriers. Each of these three categories are defined as follows:

Private Carrier

To include those who own the logs, lumber or other commodities to be transported. Logging contractors who perform the entire operation, from woods to mill are not private carriers.

Common Carrier

Any person who transports for hire or who holds himself out to the public as willing to transport for hire, compensation or consideration by motor vehicle, from place to place, persons or property, or both, for those who may choose to employ him.

Contract Carrier

Any person engaged in transportation by motor vehicle of persons or of property, or of both, for compensation, under special and individual agreements, leases or other arrangements, and not included in the term common carrier as hereinbefore defined.

Upon application to the P.U.C. commissioner authority may be granted by that agency for the transportation of logs, poles or piling over public highways. However, justification of such a permit must be clearly stated on the applicant's request for authority.

Before requesting authority for a specific log route, local state highway officials should be consulted to determine local restrictions on highway use. The State Highway Commission has final

authority and recommends or suggests such restrictions as in their opinion should be imposed for the protection of the highway as will best satisfy the interest of the general public.

Authority granted by the P.U.C. commissioner for log routes includes only those roads maintained by the state and classed as state highways. If the log route is to make use of a section of county highway or city street an appropriate authority such as the county commissioners with respect to county highways, and the municipal authority with respect to city streets, should be consulted for authority.

Application for a permit should be submitted to the P.U.C. commissioner's office on Form MP 900a* which is self-explanatory. Common and contract carriers engaged in transporting logs, poles or piling are class B carriers and must submit Form MP 906 in conjunction with their permit request.

In the case of common and contract carriers the application shall state the ownership, financial condition (Form MP 904 C)*, equipment to be used, and the light and combined weights thereof, the physical property of the applicant, character of service, whether transporting property or persons, the district or territory in which the operation is conducted, and if upon a fixed route, the termini thereof, and such other information as the commissioner may require. This information requires the use of the three forms previously mentioned. Forms MP 900a, MP 906 and MP 904 C*.

Private carriers need only to submit a statement of ownership, equipment to be used, the light and combined loads thereof, and the

^{*} See folder on back cover.

character of property to be transported and such other information as the commissioner may request. The above information requires only the use of Forms MP 900a and MP 906.

No vehicle is allowed to operate under more than one of the three classes, except that a private carrier may be operated temporarily as a contract or common carrier exclusively in intrastate transportation. However, authority for such an operation must be granted by the P.U.C. Commissioner.

Identification Plate

Identification plates issued by the commissioner should at all times be visible and legible and be placed as close as possible to the state license plates.

Receipt and Weight

The receipt issued by the commissioner containing the prescribed light and combined weights should be carried on the vehicle. The failure to do so voids the receipt and makes the violator liable to loss of permit.

Temporary Permits

Temporary permits are issued by the commissioner only in case of an emergency where in the public interest it becomes necessary to issue such permits. The temporary permit's termination will be determined by the commissioner.

Annual Reports

Carriers, with the exception of private carriers, must annually, on or before the first day of April, file with the commissioner a verified report, the form of which will be prescribed by the commissioner, covering the previous year, ending December 31st. The report

should include the cost and value of the property, franchises and equipment of the reporting company; the number of employees and officers; the amount expended for improvements, additions and additional equipment, how expended, and the kind and character of such improvements; the gross earning from each branch of business and from all other sources, the operating and other expenses; the balance of profit or loss; a statement of the indebtedness of the reporting motor carrier; and a complete exhibit of the financial operations of the year, with an annual balance sheet; information in regard to rates and regulations concerning fares and freights; agreements, arrangements or contracts with other motor carriers and other common carriers, and such other matters pertaining to its operation as the commissioner may require. Hearing for Carrier Permits

In case of application for a common carrier it is necessary in some instances to hold hearings to determine whether or not a permit shall be granted. However, hearings are not required for common carrier permits that are issued for the sole purpose of transporting logs, poles or piling.

Hearings are not required for contract carrier permits issued for the express purpose of hauling logs, poles, or piling.

Fees

All vehicle operation under the provisions of the Motor Transportation Code must pay a five dollar (\$5) license fee for any calendar year or fraction thereof.

In addition to the base license fee, a tax for the use of the highway must be paid and shall be determined by the mileage traversed in Oregon and the declared combined weight of vehicle and load.

Mileage Tax Rate Computation

Table 1 gives a complete mileage tax rate table for payment requirements on a weight basis. The weight to be used is that of the combined declared weight. Truck and trailers must be figured as two individual vehicles. However, trailers being towed or hauled empty on the return trip need not be included when figuring extreme mileage.

In computing the tax for each vehicle the extreme mileage traveled in Oregon should be multiplied by the appropriate weight tax group. The act provides that any fuel taxes paid to the state on fuel consumed in connection with the taxable mileage accumulated, can be deducted from the total tax. The tax to be paid can therefore be computed by subtracting the fuel tax from the product derived by multiplying the extreme mileage by the appropriate weight tax group rate.

Table 1
MILEAGE TAX RATE TABLE

Declared Combined Weight Groups (Pounds)	Fee Rates Per Mile (Mills)	Declared Combined Fee Rates Weight Groups Per Mile (Pounds) (Mills)
4,501 to 6,000 inc. 6,001 to 8,000 inc. 8,001 to 10,000 inc. 10,001 to 12,000 inc. 12,001 to 14,000 inc. 14,001 to 16,000 inc. 16,001 to 18,000 inc. 18,001 to 20,000 inc. 20,001 to 22,000 inc. 22,001 to 24,000 inc. 24,001 to 26,000 inc. 26,001 to 28,000 inc.	6.00 7.50 9.00 10.50 12.00 13.50 15.00 16.50 18.00 19.50 21.00 22.00	28,001 to 30,000 inc. 23.00 30,001 to 32,000 inc. 24.00 32,001 to 34,000 inc. 25.50 34,001 to 36,000 inc. 26.50 36,001 to 38,000 inc. 27.50 38,001 to 40,000 inc. 29.00 40,001 to 42,000 inc. 30.50 42,001 to 44,000 inc. 32.00 44,001 to 46,000 inc. 35.00 48,001 and over 36.50

Mileage Tax Rate Records

All carriers must keep daily records upon forms prescribed by the commissioner (Form MA 740B)*, of all vehicles used during the current month. On or before the twentieth day of the following month, upon the prescribed form (Form MA 740A)*, the operator must submit summaries of his daily records. Daily records shall be kept on file in the carrier's office until written permission for their destruction is received.

Mileage Tax Rate Payments

Payments must be made by all carriers on or before the twentieth day of the following month. If the carrier fails to make payment on or before that time, he must pay a penalty of 1.5 per cent per month of the original fee.

Size of Vehicles and Loads

- Width not to exceed a total outside width of over eight (8) feet, except under special permit issued by the State Highway Department.
- Height not to exceed $12\frac{1}{2}$ feet and not to exceed 11 feet unless operated by permission of the State Highway Department.
- Length not to exceed 35 feet for a single vehicle or 50

 feet for a train of vehicles. The total length must
 be measured from front bumper to extreme end of load
 in all cases. Poles, piling and logs are not included
 in this classification and Forms MP 960* and E 270-5M4-47* must be submitted to the P.U.C. Commissioner

^{*} See folder on back cover.

and the State Highway Department for approval of the route to be traversed and the length of loads to be hauled.

Overhang - not to exceed three feet beyond the front bumper of any vehicle. No loads shall extend unsupported beyond the last axle of a vehicle, a distance greater than one-half of the length of the wheelbase of the vehicle carrying the load. In the case of a truck and trailer, the overhang shall not exceed one-third of the total wheelbase.

Weights of Vehicles and Loads

The motor vehicle laws of the State of Oregon require that no vehicle be driven upon any state highway with more than a maximum individual wheel weight in excess of 8,000 pounds or an axle weight in excess of 16,000 pounds. The total combined weight of any vehicle and load or any combination of vehicles and loads must not exceed 54,000 pounds, regardless of tire width. The combined weight in pounds, subjected to an axle, shall not exceed the product of 600 multiplied by the sum of the tire widths.

On paved highways an individual wheel weight not exceeding 9,000 pounds is lawful. However, in no case shall the combined weight exceed 54,000 pounds.

Subject also to the maximum axle and wheel loads already mentioned, the gross weight of any motor vehicle or combination of vehicles shall not exceed that determined by the following procedure.

The total gross load in pounds, including both vehicle and load or combinations of attached vehicles and loads shall not exceed

the value derived by the formula 700 (L + 40) where "L" is the over-all distance in feet between the front and rear axles of the vehicle or first and last axles of a combination of vehicles.

The axle loads here considered are the total load on all wheels spaced longitudinally so that their centers are at least 40 inches apart.

Trucks equipped with a tandem rear axle and pulling a tandem-axled trailer may exceed 54,000 pounds. Weights of these vehicles and loads shall not exceed that determined by the formula 750 (L + 40) where "L" is the distance in feet between the first and last axles of all the axles transporting the load. However, where the distance between the first and last axle is 18 feet or less the permissible gross weight shall be determined by the formula 650 (L + 40), except where the formula provides a gross weight of less than 32,000 pounds. In such cases 32,000 pounds shall be the gross weight.

In no event shall the combined gross weight of any vehicle exceed 72,000 pounds.

In all weight classes discussed, a 10 per cent tolerance is allowed in the transporting of logs, poles and piling, but should not be consistently overrum.

Insurance

Public liability and property damage must be held by all carriers in the State of Oregon. The policy must be written by an authorized company doing business in the State of Oregon, or have the endorsement of the State of Oregon. It must be in the sum of \$5,000 property damage and \$5,000/\$10,000 liability.

CONCLUSION

The writer has attempted to abbreviate and put into a few short pages motor transportation laws that have been built up over a number of years. As motor transportation progressed so progressed the need for regulation and strict control. The laws herein discussed are not necessarily those which will benefit the logging industry in monetary figures, but will aid in the procuring of a better feeling between the logger and the public.

If roads are badly rutted and full of holes due to logging truck traffic, the public resents it and looks with disfavor upon the operators. A large portion of the present laws was designed to minimize road deterioration and all operators should adhere to the laws in an attempt to keep public favor with the logger and not against him.

The operator who adheres to the laws and cooperates with those agencies set up to enforce and administer them will find himself in a much better position than those who fail to cooperate.

Every effort was made to include in this paper all information necessary for the convenience of the logger or truck operator. Detail and specific information can be obtained promptly from the Secretary of State's office or the Public Utilities Commissioner.

To be filed with the Public Utilities Commissioner of the State of Oregon between the 1st and 20th of each month, to cover the preceding calendar month, accompanied by payment of amount due.
