FARMERS' AND HOME-MAKERS' WEEK AND CONFERENCE SESSIONS

**Are You Planning to Attend the Farmers'
Week and Conference Sessions at the
Oregon Agricultural College**

FEBRUARY 1-7, 1915

It will mean profit, instruction, and inspiration to you. This will be the greatest event ever held at the College. You can't afford to miss it.

Musical programs and entertaining recreations every evening.

Special features and a regular daily program for women.

Farmers' Week for 1915 will be different; it will be alive, electrifying, inspiring. It will consist of a happy combination of substantial College work; conventions and conferences of some of the State's greatest industrial and professional associations; and exhibits, displays, and entertainments that are likely to appeal to all who are interested in Agriculture and its allied industries. Whether or not you belong to such an organization as the State Dairy Association, if you are interested in dairying, you will gain much from attending its annual convention during Farmers' Week. The same is true with regard to the Home-Makers' Conference, the Seed Growers' Conference, and the Conference of Rural Ministers and religious Workers. Every day of the week, and any day of the week, there is something that may be of particular interest and lasting value to you. Write for the program.

The bulletins of the Oregon Agricultural College are sent free to all residents of Oregon who request them

REGULAR WORK. .

Agronomy.—Lectures dealing with such important subjects as Soil Fertility, Farm Management, Field Crop Production, Irrigation Farming, Farm Mechanics, etc.

Animal Husbandry.—Practical lessons in judging all classes of horses, beef cattle, hogs, and sheep. Special lectures on Feeding, Breeding and Management of Live Stock under Oregon conditions.
