WHEAT CULTIVAR ABBREVIATIONS

Compiled by

OREGON STATE UNIVERSITY WHEAT PROGRAM

The strong emphasis on crossing winter and spring wheat cultivars assembled from countries throughout the world necessitated combining into one workable copy a large number of abbreviation lists from various organizations and cooperators. The following lists were used as the basis for compiling the present list: Consolidated list of abbreviations of spring wheat varieties in the near east region, USDA wheat cultivar abbreviations, abbreviations of winter wheats compiled at the Turkey Wheat Research and Training Center, abbreviations of spring wheats at CIMMYT, Mexico, and abbreviations of winter wheats compiled at Oregon State University. Various other lists from country programs were included.

There were many duplications of abbreviations, as anticipated, and the cultivar occurring most commonly was listed for use under the STD abbreviation column. Columns for the USDA and other cooperators' abbreviations are listed in adjoining columns. C.I. and P.I. numbers were also included when available. In the future, identical cultivar names with different selection numbers or years will not be included unless assigned new C.I. numbers. However, there are a number of cultivars having several selection numbers already included in the list.

The present list is not meant to be a thorough compilation of all known wheat cultivars and abbreviations. On the contrary, it is an attempt to combine those cultivars that are commonly being used as parents in the germplasm being exchanged internationally. A computer file of the initial list will be maintained and updated periodically as new entries are submitted. The list will serve to standardize abbreviations for those wheat breeders cooperating in international exchange of germplasm.

We would appreciate receiving any information concerning new cultivars: names, abbreviations, growth habit and origin. Also, any additions or corrections to the present list would be appreciated. This information can be addressed as follows:

Dr. W. L. McCuistion
Crop Science Department
Oregon State University
Corvallis, Oregon 97331
USA

CODES

A. Nationality of a Cultivar

Any known nationality of a cultivar was listed. Cooperators are encouraged to assist in completing the origin of the remaining cultivars not indicated. The code system followed was the "Code for the representation of names of countries" by ISO-International Organization for Standardization, Technical Committee ISO-TC46-Docummentation, October, 1972.

Nationality Code

KEN	=	Kenya	ZAIRE	=	Zaire
KOR	=	Korea	ZIM	=	Zimbabwe
			ZAM	=	Zambia

B. GH - - - - Growth Habit

W = Winter habit

I = Intermediate habit

S = Spring habit

C. SP - - - - Species

Assume all entries are common wheat, Triticum aestivum unless designated as follows:

D = Triticum durum

T = Triticale (Triticum x Secale)

D. STD - - - - Standardized International Abbreviation. We recommend this abbreviation for all future pedigree lists.

E. USDA = United States Department of Agriculture abbreviation

F. Others = Any abbreviation used by another cooperator

G. CI or PI No. = Cereal Investigation or Plant Introduction Number

H. *2 = Backcross to the parent preceding or following and the number indicates total times parent was crossed.

I. () = Parentheses following an entry under cultivar denotes a location name, company name or commonly used term.
