Prepared by Stanley D. Miles

Extension Economist, Oregon State University

The following pages contain estimates of agricultural production and value of farm and ranch sales for 1990. These are preliminary or first estimates and will be revised and updated as additional information is received. The estimates are made by Oregon State University Extension Service personnel. County Extension agents develop estimates of acreage, yields, prices, number of cattle, sheep, hogs, and poultry. After all the county reports are completed, state totals are tabulated by Oregon State University Extension economists.

"Other farm income," particularly farm forestry or small woodlot products is included in these agricultural estimates. Farm forestry has grown over time and is quite significant now at \$233 million (see page 8). Caution should be used in comparing these agricultural estimates with forestry numbers as the farm forestry sales may be double counted.

This summary report provides a quick overview of Oregon agriculture for this past year. Oregon agricultural production information is requested by individuals, state and federal agencies, fertilizer and chemical companies, machinery companies, university specialists and administrators, students, consulting companies, news media, and other agribusiness firms.

The Extension Service maintains detailed information on Oregon and United States agriculture and publishes other reports. Each year we publish more than 40 Commodity Data Sheets on the major agricultural commodities produced in Oregon. These contain a county breakdown of production, data on other Northwest states or states that are important to the particular commodity and total figures for the United States. These sheets contain data for the last 3 to 5 years.

Commodity data sheets are published in the following groupings: grains, hay, forage, field crops, tree fruits and nuts, small fruits and berries, vegetables and truck crops, specialty products, and livestock and poultry. If you want to subscribe to these reports please write to Economic Information Office, Agricultural and Resource Economics, Oregon State University, Ballard Extension Hall 219, Corvallis, Oregon 97331-3601.

**OREGON STATE UNIVERSITY  
EXTENSION SERVICE**

---

The Oregon State University Extension Service educates Oregonians by delivering research-based, objective information to help them solve problems, develop leadership, and manage resources wisely.

Extension's agriculture program provides education, training, and technical assistance to people with agriculturally related needs and interests. Major program emphases include food and fiber production, farm business management, marketing and processing of agricultural products, and resource use and conservation.
