

Supplementary Table 5. List of databases and keyword searches used to locate relevant literature on species recovery, assisted recolonization, and unassisted (re)colonization. Keywords were used alone and in various combinations. The first four pages or up to 50 results, whichever was reached first for each Google Scholar searches were checked for relevant recovery/recolonization information.

<b>Databases</b>	<b>Keywords</b>
Google Scholar	<b>1.</b> [island name] AND eradication; [island name] AND restoration; [island name] AND translocation <b>2.</b> [eradication OR removal] AND [recovery OR response OR "negative impacts" OR "decline" OR "population reduction"] AND [island]
