

**WORLD WATER TALLY**

The water vapor in the air is called atmospheric water. This water is 0.001% of the world's water supply.

**WORLD WATER TALLY**

Ice caps and glaciers are 1.81% of the world's water supply.

**WORLD WATER TALLY**

Groundwater is 0.62% of the world's water supply

**WORLD WATER TALLY**

Soil moisture is 0.005% of the world's water supply.

**WORLD WATER TALLY**

Rivers contain 0.0001% of the world's water supply.

**WORLD WATER TALLY**

Lakes contain 0.017% of the world's water supply.

**WORLD WATER TALLY**

97.54% of the world's water supply is found in the oceans.

Evaporation Powered by Solar Energy

Escape to the atmosphere through transpiration. Move ahead 2 spaces.

You are absorbed by a Douglas-fir root. Move ahead 1 space.

**RAIN**

Snow and ice. Miss one turn.

A mole eating a worm eats you too. Miss one turn.

You land on a leaf and are evaporated. Go to the cloud.

You are pumped from the ground by an irrigation system. Go back 3 spaces.

Moving through the soil, you find a gopher hole. Move ahead 2 spaces.

Spring flow. Return to the surface. Move ahead 2 spaces.

Rapids. Move ahead 5 spaces.

**SOIL INFILTRATION**

You are on the foot of a duck when it flies. Go back 3 spaces.

You are swallowed by a bass. Miss one turn.

You are absorbed by a cattail plant. Miss one turn.

Falling over a waterfall, you are evaporated. Go to the cloud.
