# Scouring Rush

Scientific name: *Equisetum hyemale*  
Common names: Tall scouring rush, jointgrass

By Martin Zimmerman, Sherman County  
Extension Agent, Oregon State University

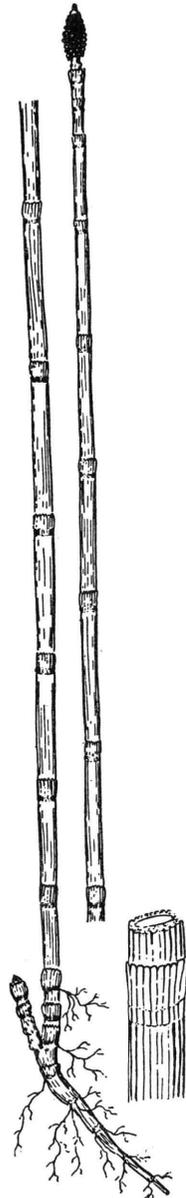

Perennial

Spore producing cone

Stems evergreen, hollow,  
rarely branched

Leaves scale-like and in whorls

Spreads by roots and spores

Found in moist areas both east and west of the Cascades.

Control: 2 to 4 pounds of amitrole T per acre. Add wetting agent. Retreatment may be necessary. Apply spray when weeds are 6 to 8 inches high.

This is one of a series of *Fact Sheets* reporting Cooperative Extension work in agriculture and home economics, F. E. Price, director. Printed and distributed in furtherance of Acts of Congress of May 8 and June 30, 1914. Oregon State University, Oregon counties, and U. S. Department of Agriculture cooperating.
