## **FOREWORD**

The General Services Administration, through the National Archives and Records Service, is responsible for administering the permanently valuable noncurrent records of the Federal Government. These archival holdings, now amounting to more than 1.3 million cubic feet, date from the First Continental Congress and consist of the basic records of the legislative, judicial, and executive branches of our Government. The Presidential libraries of Herbert Hoover, Franklin D. Roosevelt, Harry S. Truman, Dwight D. Eisenhower, John F. Kennedy, Lyndon B. Johnson, and Gerald R. Ford contain the papers of those Presidents and of many of their associates in office. These research resources document significant events in our Nation's history, but most of them are preserved because of their continuing practical use in the ordinary processes of government, for the protection of private rights, and for the research use of scholars and students.

To make our holdings more readily available for research, we reproduce selected records in various forms—photostats, photographs, slides, facsimiles, and microfilm. We publish catalogs such as this one for the census records on microfilm. We believe that it will prove helpful to anyone considering the purchase of our microfilm publications.

## Preface

Collectively, the records in the National Archives document the history of the United States Government from the First Continental Congress. Most of the records were originally created by the legislative, judicial, or executive branches to satisfy legal obligations or to meet administrative needs. In addition, the records contain information of importance for understanding various aspects of American life, both past and present.

Although no Federal record was ever created specifically to fulfill the needs of the genealogist, the holdings of the National Archives have become valuable sources of genealogical information. Perhaps the richest source for genealogists is the information contained in the Federal decennial population census schedules.

This catalog is a necessary finding aid for those who wish to order microfilm copies of the 1900 census schedules, the most recent schedules available.

## Introduction

This catalog lists the 1900 population census schedules (reproduced as microfilm publication T623) and the 1900 Soundex system (reproduced as a separate microfilm publication for each State and Territory). The census schedules are arranged by State or Territory and then by county. For a guide to the Soundex system, see appendix I of this catalog.

This catalog supplements the *Federal Population Censuses, 1790-1890* catalog, which contains details for ordering copies of the original population schedules for 1790-1890, including the 1880 Soundex. Requests for that catalog should be directed to the Publications Sales Branch (NEPS), National Archives, Washington, DC 20408.

### The 1900 Census Schedules

Federal decennial population census schedules contain a wealth of information for genealogists, historians, and social scientists. Census schedules are of use to the family historian and researcher interested in westward expansion, the status of free and slave labor, regional and local history, immigration, and so forth. Often they provide evidence of citizenship.

The 1900 census consisted originally of 7 schedules. Two population schedules were prepared, one for native Americans and one for all other residents. These are the schedules that are reproduced as microfilm publication T623. The five remaining schedules, containing information on agriculture, manufacturers, mortality, and crime, are not available from the National Archives.

As a rule the information gathered in each successive decennial census is progressively more detailed. The 1900 census schedules, which contain the most information of all the schedules released to date, give for each person: name; address; relationship to the head of the household; color or race; sex; month and year of birth; age at last birthday; marital status; if a wife is listed within the household, then the number of years married, number of children born of that marriage, and number of children living; places of birth of each individual and of the parents of each individual; citizenship; if the individual is foreign born, then the year of immigration and the number of years in the United States; the citizenship status of foreign born individuals over age 21; occupation; whether or not person can read, write, and speak English; whether home is owned or rented; whether or not home is a farm; and whether or not home is mortgaged.

### Card Index (Soundex)

A card index to the 1900 census schedules was prepared by the Works Projects Administration during the 1930s. Information was abstracted from the census schedules and placed on filecards.

The cards give name, race, month and year of birth, age, citizenship status, place of residence by state and county, civil division, and, where appropriate for urban dwellers, the city name, house number, and street name. The cards also list the volume number, enumeration district number, and page and line numbers of the original schedules from which the information was taken.

Three types of cards were prepared: household cards; individual cards; and cards for institutions, military posts, naval stations, and U.S. flag vessels.

*Household cards* show the name of the head of the household, race, month and year of birth, age, birthplace, and citizenship status if foreign born; a street address may be included. The card then lists each member of the household by name and shows the relationship to the head of the household, month and year of birth, age, birthplace, and citizenship status if foreign born. For persons living within the house who were not members of the immediate family of the head of the household, an individual card was also prepared.

*Individual cards* were prepared for persons living alone; persons living with families who were not immediate members of the family; members of an immediate family but who had different surnames; persons in hotels, boarding and rooming houses, and institutions; persons on military posts and naval ships and at naval stations; and persons enumerated on U.S. flag vessels in all U.S. ports on the first day of the census only. These cards give the individual's name, month and year of birth, age, birthplace, citizenship status, address, name of person or institution with whom enumerated, and any relationship to that person or institution.

*Institution, military post, naval station, and U.S. flag vessel cards* show only the address of the establishment and the number of persons enumerated. Names of the individual persons are not listed.

The cards are arranged by State or Territory (a separate microfilm publication for each) and thereunder by the Soundex

system; i.e., alphabetically by the first letter of the surname, thereunder by a code number representing the sound of the surname, and thereunder alphabetically by first name.

A guide for the use of the Soundex system is reproduced as appendix I to this catalog. Appendix II contains a list of abbreviations used for relationships and citizenship status on the cards.

## Enumeration Districts

Because of errors in names transcribed and because of variant uncommon spellings of a name, the researcher may not be able to locate an entry in the Soundex system for a given head of family or individual living in a specific area. Persons wishing to consult the schedules for a given town, a minor civil division or geographic area, or a ward of a large city need to know the enumeration district numbers assigned to that designated place.

Microfilm publication T1210, *Census Enumeration District Descriptions, 1900*, arranged alphabetically by State and thereunder by county, identifies the enumeration district number assigned within States, counties, and cities. The enumeration district boundaries described in T1210 are as they were in 1900. Present-day boundaries may not be the same. Consult local sources if you are not sure.

A list of the rolls for T1210 follows. Prices and ordering procedures for this microfilm publication are the same as for the census schedules and Soundex. Copies of T1210 are also available for researcher use in the regional branches of the National Archives.

## Other Lists and Guides

*Federal Population Censuses, 1790-1890* (1974) and *Catalog of National Archives Microfilm Publications* (1974) list more than 113,000 rolls of microfilm. These catalogs are available free of charge from the Publications Sales Branch (NEPS), National Archives, Washington, DC 20408.

### Sale of Microfilm publications

Positive copies of microfilm may be purchased at prices shown in this *Catalog* or quoted by the Publications Sales Branch. Single rolls may be purchased separately. Prices are subject to change without advance public notice. The price includes postage or shipping on orders sent to domestic ad-

dresses (within the continental United States) at the fourth-class library rate. If the customer requests that microfilm be sent to a foreign address (including Canada or Mexico), or requests a special service to domestic addresses (United Parcel Service or airmail), the order is subject to a shipping fee in addition to the cost of the microfilm.

The following special shipping fees are computed as a percentage of the cost of the microfilm order:

	<i>Surface</i>	<i>Airmail</i>
Domestic (UPS) . . . . .	2%	4%
Foreign* . . . . .	5%	15%

Parcel post insurance is available to many foreign countries for surface mail and airmail; however, the maximum amount varies from country to country. This service is available when requested by the customer and the following fees apply:

<i>Liability</i>	<i>Fee</i>
\$ 0.01 to \$15.00 . . . . .	\$0.90
15.01 to 50.00 . . . . .	1.20
50.01 to 100.00 . . . . .	1.50
100.01 to 200.00 . . . . .	2.10
200.01 to 300.00 . . . . .	2.70
300.01 to 400.00 . . . . .	3.30

\*No air parcel post to Canada

Orders should be submitted on NATF Form 36, Microfilm Order (copies of which appear at the end of this Catalog), or on institutional or commercial purchase order forms. Orders can be handled more quickly when they include the correct microfilm publication number(s), roll number(s), and price(s). Titles and dates of publications are not needed. Additional order forms will be sent on request.

Payment must accompany each order and should be in the form of a check or money order; cash payments are discouraged. Orders may also be charged to VISA or MASTER CHARGE accounts. Payments from outside the US should be made by international money order, payable in US dollars, or check drawn on a US bank. Make checks or money orders payable to National Archives Trust Fund (NEPS) and mail to Cashier, National Archives Trust Fund Board, Washington, DC 20408.

State and local government agencies, educational institutions, and businesses may place orders for \$26 or more on an accounts-receivable basis. Bills are sent after shipment. Accounts of more than 30 days overdue are subject to late charges of up to 9 percent per year. Purchasers with special billing requirements must state them when placing orders and must complete special forms for prior approval.

The National Archives will replace any film that has been improperly produced, but the purchasers are responsible for checking immediately upon receiving microfilm order to see that they have received the correct items, that the order is complete, and whether there has been any damage in shipping. If there has been damage in shipping or an error, the purchasers must notify the Publications Sales Branch within 90 days if they are to receive an adjustment or exchange. Purchasers may not return microfilm orders without written permission of the Publications Sales Branch.

## Queries

Questions concerning the National Archives microfilm publication program should be addressed to: Publications Sales Branch (NEPS), National Archives, Washington, DC 20408.

## Prices

The price of each roll of microfilm in this catalog is \$13.00.  
Prices are subject to change without advance public notice.

The price of microfilm in this catalog reflects the third general price increase in 29 years. The microfilm price includes the cost of film stock and chemicals, boxes and reels, postage, and salaries. A fixed price per roll has been established because most of the costs of reproducing and selling microfilm are the same for all rolls of film, regardless of length, and the establishment of such a price permits a substantial saving in order-processing costs.

The National Archives microfilm publication program is financed from a trust fund established by the National Archives Trust Fund Board Act (44 U.S.C. 2307).

**1900 Census Schedules  
T623. 1,854 rolls.**

The 1900 census schedules are arranged by State or Territory and thereunder by county. In some instances the names of large cities also appear. The entries may not be in strict alphabetical order. Be sure to review the listings for the entire State or Territory before placing your order.

Entries also include enumeration district numbers. If you wish to order the census schedules for a minor civil division or geographic area within a particular county or a certain ward within a given city, it is necessary for you to know the enumeration district number assigned to that place. Sometimes the schedule for a county or a city has been filmed on more than one roll, and the correct enumeration district number is needed in order to select the correct roll. Descriptions of census enumeration districts for the 1900 census are reproduced on the 10 rolls of microfilm publication T1210 (see page vi of this catalog).

## **1900 Soundex**

Index (Soundex) to the 1900 Population Schedules. 7,846 rolls.

The card index to the 1900 census schedules has been reproduced by NARS as a separate microfilm publication for each State or Territory. The cards give name, race, month and year of birth, age, citizenship status, place of residence by State and county, civil division, and, where appropriate for urban dwellers, the city name, house number, and street name. The cards also list the volume number, enumeration district number, and page and line numbers of the original schedules from which the information was taken.

The letter at the beginning of the Soundex code is the first letter of the surname of the individual; the number is a phonetic code for the surname, followed by the first name. A guide to the use of the Soundex system is found in appendix I of this catalog. Be sure to read the introduction carefully before ordering.

### Guide to the Soundex System

The Soundex filing system, alphabetic for the first letter of surname and numeric thereafter as indicated by divider cards, keeps together names of the same and similar sounds but of variant spellings.

To search for a particular name, you must first work out the code number for the surname of the individual. No number is assigned to the first letter of the surname. If the name is Kuhne, for example, the index card will be in the "K" segment of the index. The code number for Kuhne, worked out according to the system below, is 500.

#### Soundex Coding Guide

Code	Key Letters and Equivalents
1	b, p, f, v
2	c, s, k, g, j, q, x, z
3	d, t
4	l
5	m, n
6	r

The letters a, e, i, o, u, y, w, and h are *not* coded.

The first letter of a surname is *not* coded.

Every Soundex number must be a 3-digit number. A name yielding no code numbers, as Lee, would thus be L 000; one yielding only one code number would have two zeros added, as Kuhne, coded as K 500; and one yielding two code numbers would have one zero added, as Ebell, coded as E 140. Not more than three digits are used, so Ebelson would be coded as E 142, *not* E 1425.

When two key letters or equivalents appear together, or one key letter immediately follows or precedes an equivalent, the two are coded as one letter, by a single number, as follows: Kelly, coded as K 400; Buerck, coded as B 620; Lloyd, coded as L 300; and Schaefer, coded as S 160.

If several surnames have the same code, the cards for them are arranged alphabetically by given name. There are divider cards showing most code numbers, but not all. For instance, one divider may be numbered 350 and the next one 400. Between the two divider cards there may be names coded 353, 350, 360, 365, and 355, but instead of being in numerical order they are interfiled alphabetically by given name.

Such prefixes to surnames as "van," "Von," "Di," "de," "le," "Di," "D," "dela," or "du" are sometimes disregarded in alphabetizing and in coding.

The following names are examples of Soundex coding and are given only as illustrations.

#### Native Americans, Orientals, and Religious Nuns

Researchers using the Soundex system to locate religious nuns or persons with American Indian or oriental names should be aware of the way such names were coded. Variations in coding differed from the normal coding system.

Phonetically spelled oriental and Indian names were sometimes coded as if one continuous name, or, if a distinguishable surname was given, the names were coded in the normal manner. For example, the American Indian name Shinka-Wa-Sa may have been coded as "Shinka" (S 520) or "Sa" (S 000). Researchers should investigate the various possibilities of coding such names.

Religious nun names were coded as if "Sister" was their surname, and they appear in each State's Soundex under the code "S 236." Within the State's Soundex Code S 236, the names are not necessarily in alphabetical order.
