To Manufacturers, Dealers, and Users of Commercial
Fertilizers and Agricultural Lime:

The Oregon State Fertilizer Law was enacted by the State Legislature in biennial session in 1905. The State Lime Law dates from the biennial session of 1917. Responsibility for the enforcement of both laws in the intervening years has rested with the State Agricultural Experiment Station. On or after July 1, 1931, this responsibility will no doubt be transferred to the State Department of Agriculture in accordance with the Act creating the state department.

The last report on inspection and analytical work, covering the biennium 1929-1930, was issued in January, 1931, as Experiment Station Circular No. 98. It still may be obtained upon request addressed to the Agricultural Experiment Station at the college. The enclosed tabulation of check-up analyses on manufacturers' guarantees for the season of 1931 completes the work of the Experiment Station in this field.

In this connection it is a pleasure to record the harmonious relationship that has prevailed over this period of years between manufacturers and dealers on the one hand and this law-enforcing agency on the other. Very rarely has it been necessary on our part to resort to the rather drastic procedure provided by law to prevent fraudulent and questionable marketing practices. To a far greater extent we have relied upon persuasion and education to accomplish the end sought by the legislators. County agricultural agents and extension specialists have been invaluable agencies in spreading fertilizer and agricultural lime news and facts. Through them, in steadily increasing numbers, users of fertilizers and lime have sought the advice and council of the Experiment Station authorities on the purchase and use of these commodities. It is coming to be fairly well recognized that commercial fertilizers and agricultural lime must inevitably play an important part in the further development of intensive agriculture on the Pacific Coast.

For the new law-enforcing agency--the State Department of Agriculture--we bespeak your continued hearty cooperation and support.

Yours very truly,

J. S. Jones
