

CONTROL OF TUBER FLEA BEETLE IN POTATOES WITH FOLIAR APPLIED INSECTICIDES

Ron Collins

Consulting Entomologist, Hillsboro, OR 97123

Pydrin[®] 2.4 EC at 0.2 lb. a.i./acre, Monitor[®] 4 E at 0.75 lbs. a.i./acre, S-3206 2.4 EC at 0.05, 0.1, and 0.2 lbs. a.i./acre were applied in a single foliar application to potatoes on August 6, 1981. All treatments gave good control after four days except S-3206 at 0.05 lb. a.i./acre. All treatments gave only poor to fair control after eight days.
