

The Oregon State University Extension Service educates Oregonians by delivering research-based, objective information to help them solve problems, develop leadership, and manage resources wisely.

Extension's agriculture program provides education, training, and technical assistance to people with agriculturally related needs and interests. Major program emphases include food and fiber production, farm business management, marketing and processing of agricultural products, and resource use and conservation.

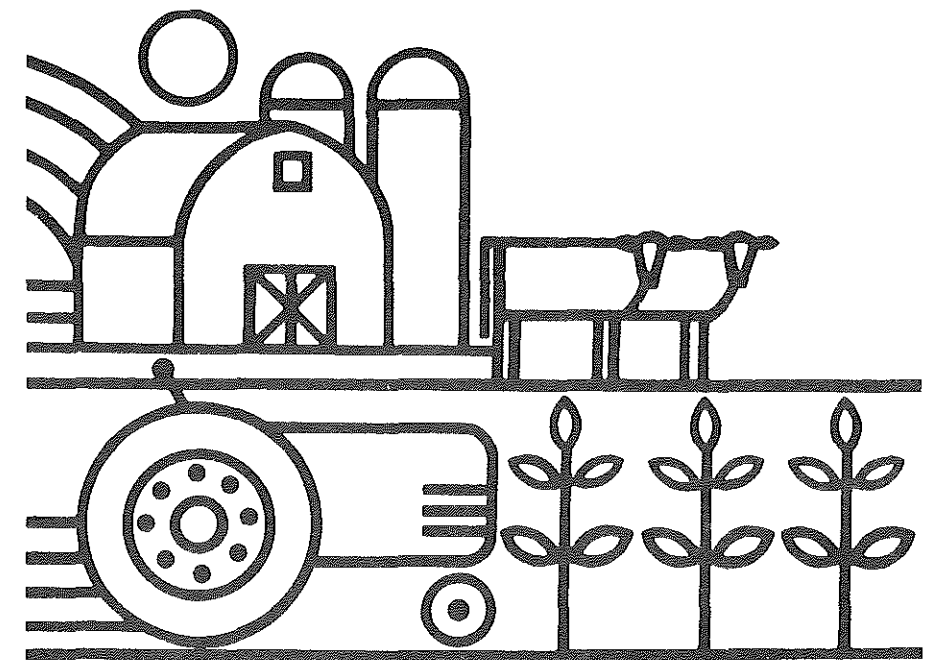

Extension Service, Oregon State University, Corvallis, O.E. Smith, director. This publication was produced and distributed in furtherance of the Acts of Congress of May 8 and June 30, 1914. Extension work is a cooperative program of Oregon State University, the U.S. Department of Agriculture, and Oregon counties.

Oregon State University Extension Service offers educational programs, activities, and materials—*without regard to race, color, national origin, sex, age, or disability*—as required by Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973. Oregon State University Extension Service is an Equal Opportunity Employer.

Estimates are not included for many specialty crops, pasture, and rangeland.

Prepared by Stanley D. Miles

Extension Economics, Oregon State University

The following pages contain estimates of agricultural production and value of farm and ranch sales for 1991. These are preliminary or first estimates and will be revised and updated as additional information is received. The estimates are made by Oregon State University Extension Service personnel. County Extension agents develop estimates of acreage, yields, prices, number of cattle, sheep, hogs, and poultry. After all the county reports are completed, state totals are tabulated by Oregon State University Extension economists.

"Other farm Income," particularly farm forestry or small woodlot products is included in these agricultural estimates. Farm forestry has grown over time and is quite significant now at \$205 million (see page 8). Caution should be used in comparing these agricultural estimates with forestry numbers as the farm forestry sales may be double counted.

This summary report provides a quick overview of Oregon agriculture for this past year. Oregon agricultural production information is requested by individuals, state and federal agencies, fertilizer and chemical companies, machinery companies, university specialists and administrators, students, consulting companies, news media, and other agribusiness firms.

The Extension Service maintains detailed information on Oregon and United States agriculture and publishes other reports. Each year we publish more than 40 Commodity Data Sheets on the major agricultural commodities produced in Oregon. These contain a county breakdown of production, data on other Northwest states or states that are important to the particular commodity and total figures for the United States. These sheets contain data for the last 3 to 5 years.

Commodity data sheets are published in the following groupings: grains, hay, forage, field crops, tree fruits and nuts, small fruits and berries, vegetables and truck crops, specialty products, and livestock and poultry. If you want to subscribe to these reports, please write to:
