

The 4-H Clothing Project

Skill Level 6

Activities suggested for Skill Level 6 of the 4-H Clothing project are listed on the inside pages, grouped according to the five learning areas which make up the project:

- Planning and evaluation
- Individual development and outreach
- Management, consumership, wardrobe building
- Textiles
- Construction

You will likely not want to undertake all of these activities in one year. However, you're encouraged to choose at least one activity from each learning area as you make your personal plan for the year. You may wish to add some activities of your own. Try and think of some which build on your previous knowledge, yet add new experiences for you.

Resource materials for Skill Level 6 are in the process of development. They will be sent to county Extension office as they become available. Materials you've received in previous skill levels will continue to be of use to you as you progress through the project. Reference materials are also available from other sources including books on how to sew, leaflets and catalogs from pattern companies, and written materials from companies which make zippers, thread, and other notions.
