

Shoestring Weed

Scientific name: *Psorealea lanceolata*
Common names: Devil's shoestring, German alfalfa

By Martin Zimmerman, Sherman County
Extension Agent, Oregon State University

Perennial

Leaf shape similar to alfalfa

Flowers in compact spikes on short stalks, bluish-white in color

Leaves have strong odor

Root system slender, tough

Shoestring weed is a perennial with a long, tough root system, from which new plants arise. It is found on range areas and cropland in the Midwest and east of the Cascades in Oregon.

Control: Limited research indicates that 20 pounds of TBA per acre gives 75% control.
