### WORKSHEET 2: SELECT SPECIES AND PROJECT FORMAT

As a team, you are researching and designing a *Most Unwanted!* poster or other media product for an invasive species of your choice. Review the instructions for your project on **Worksheet 1: Media Project Research and Design**, and follow your instructor’s requirements for group work.

- 1 Identify the species your team will research, review the resources provided by your instructor, and agree on a species to study. Select two options and have your choices approved by your instructor before starting your research.
- 2 With your team, review the choices for project format below, and negotiate with your instructor about which media product you want to create for this project.

### SUGGESTED PROJECTS

- Poster
- Slide show
- Brochure (informational for the public)
- Newspaper series of articles
- Field guide
- Animated movie
- Video to post on YouTube or other platform; for examples, check out *Oregon Field Guide*, *Dirty Jobs*, or *MythBusters*
- Music video; lyrics should cover required content about the invader
- Mural with interpretive text, such as a leaflet or informative sheet that explains the mural’s scientific content
- Website campaign for the invader
- Educational display, such as a mobile/traveling mini OMSI exhibit
- Magazine article formatted like *National Geographic*, *Popular Science*, *Discover*, or other popular science magazine
- Educational DVD
- Persuasive research paper
- Other: \_\_\_\_\_
