Bulgur in Family Meals

What is bulgur?
Bulgur is either soft or hard wheat that has been soaked in water. It is then cooked in steam or water under pressure or at normal air pressure. Next it is dried and the bran is partially removed. Bulgur is a good food for family meals and is a good source of most nutrients.

Bulgur can be used in main dishes, salads, soups, baked products, desserts, and as a side dish for family meals. It is a good "stretcher" to make meat dishes serve more people.

Bulgur particles are too hard for insects to bite into; therefore, bulgur keeps well in a loosely covered container on the shelf in a cool place.

Using bulgur
Most recipes call for cooked bulgur. It is simple to prepare by this recipe:

Crunchy Bulgur
2 cups bulgur
1 teaspoon salt
6 cups boiling water

Add bulgur and salt to boiling water; stir. Cover pan. Cook over low heat about 20 minutes. Remove from heat and let stand covered for 5 to 10 minutes. Makes 6 cups.

Can be used in combination with other foods or served with milk and sugar for breakfast. Chicken or beef broth can be substituted for boiling water to prepare bulgur as a side dish to serve with meat, poultry, or fish.

Less crunchy, cooked bulgur: Use the above directions, but soak bulgur in water overnight before cooking.
