Mortality does NOT include researchers collecting specimens.
 * Nesting only includes records of nests, eggs and or young; mere presence during the species' nesting season is not indexed as Nesting.
 @ Indexed only if freezing temperatures are noted. Because not all instances of freezing were noted, these indexed items are incomplete.

 Dowitcher (all), Goose (all), Scaup (all), etc. include all indexed pages for their constituent species as well as records not identified to species.

- Categories or papers NOT indexed include:
- 1) Abstracts and Appendices
 - 2) scientific names (see Appendix I)
 - 3) habitats or other site characteristics (see Appendix II)
 - 4) names of sites (see Appendix II)
 - 5) abundances or censuses
 - 6) plants
 - 7) J00 1:85-90 because it is superseded by J00 2:327-339.
