Basic Master Mix

9 cups sifted all-purpose flour

1/3 cup double-acting baking powder

1 1/2 cups nonfat dry milk powder

1 tablespoon salt

2 teaspoons cream of tartar

1/4 cup sugar

2 cups shortening that does not require refrigeration

Stir baking powder, milk, salt, cream of tartar, and sugar into flour. Sift together three times into a large mixing bowl or onto a large square of plain paper. Cut in shortening until mix is consistency of corn meal. Store in covered containers at room temperature. To measure the mix, pile it lightly into cup and level off evenly. Makes 13 cups of mix.

Suggestions for success

- When you add a dry ingredient to flour, scatter it over the flour instead of putting all of it in one place. This is a good start in mixing.
- Handle the mix lightly.
- If you use your hands to mix the fat into the flour, use only your fingertips. Palms of hands heat the fat; the mix will look greasy and products will be heavy.
- Pan size influences quality of product. For high quality, a cake pan should be just full when the cake is baked.
- Baking time in recipes is approximate. Check to be sure your product is done.
