INTRODUCTION

The lakes of Oregon are one of the state's greatest natural resources. Perhaps nowhere else can one find such spectacular beauty and geologic diversity among lake environments. Unfortunately, not a great deal is known about this valuable and, in many cases, pollution-threatened resource. Even a routine but thorough compilation of lakes in the state has not received the attention it should. Furthermore, dozens of lake survey and research reports, prepared by state and federal agencies, have neither been published nor distributed to any great extent.

One of the earliest inventories of Oregon's lakes was that prepared by the Office of State Engineer, Salem, Oregon (1939). It lists, in addition to the streams of Oregon, approximately 900 named lakes and the locations to 300 other lakes that were nameless. To our knowledge, no attempt has been made to revise this material, although an appendix was added to include eight lakes that were named soon after the original list was completed. Certainly, a revision is in order considering that hundreds of unnamed lakes have since been named by lake survey parties.

Recently, the Advisory Committee to the Oregon State Land Board (1969-1970), Salem, Oregon, published a report entitled "Oregon's Submerged and Submersible Lands." This work includes a 36-page compilation listing 6145 standing-water environments (lakes, ponds, marshes, sloughs, reservoirs, etc.) in Oregon. Among these are 1305 named lakes. The location (basin, township and range) and approximate acreage of each lake are given.
This report is a compilation of named lakes in Oregon. Each lake, depending on its location, is listed alphabetically under one of nine physiographic (geomorphic) divisions (Figure 1, Table 1). This arrangement will hopefully give some indication of lake morphometry, water chemistry and basin origin—provided the reader has a general knowledge of Oregon geology. For example, lakes in the Basin-Range Division are relatively shallow and saline, and have originated mainly from geologic faulting; whereas lakes in the Cascade Range are considerably deeper, generally low in dissolved solids and are mostly volcanic or glacial in origin.

Most of the lakes that are listed in this report were located on maps obtained from the Oregon State Highway Department (Table 2) and the U.S. Forest Service. Maps from the latter agency were used to locate lakes in the Willamette and Deschutes National Forests. Lakes that did not appear on maps yet were listed in survey reports by the Oregon State Game Commission and the U.S. Forest Service are included. Also, this report lists all the lakes compiled by the Office of State Engineer (1939).

Included in this report is a bibliography containing 182 references pertaining to the lakes of Oregon. This literature, we believe, represents a large part of what has been produced about the lakes of the state. Our conclusion is based on a literature survey which we conducted during the period 1 July, 1967 to 8 January, 1971. Nevertheless, many reports have been unintentionally excluded, particularly unpublished information held by the Oregon State Game and Fish commissions and the Oregon State Department of Environmental Quality.

In the listing to follow, the location (i.e., township and range) of each lake is given. An asterisk indicates that the lake is situated
Figure 1. Physiographic divisions of Oregon. Taken from Baldwin, 1964.

* Type polyconic projection-plane coordinates on Lambert projection. Scale of 1 inch equal to 1 mile (1" : 62,500").
along a geomorphic boundary that is naturally indistinct. Possibly, the lake may belong in the adjoining physiographic division. Literature pertaining to a lake is denoted by a set of one or more numbers following the name of the lake. These correspond to numbered references in the bibliography. For example, Alkali Lake is accompanied by the numbers, 12, 71, 134, 136 and 152, indicating that five references (i.e., Baldwin, 1964; Hubbs and Miller, 1948; Smith and Greenup, 1939; Snyder, 1907; and Van Winkle, 1914) apply to that particular lake.

Several lakes that are listed have more than one name, or the spelling of the name may vary. This is reported, following the township and range coordinates.

Some lakes in Oregon are referred to as ponds. Valsetz Lake in the Coast Range, for example, is known also as Valsetz Log Pond. For this reason, and because a lake and a pond are often not easily distinguishable (Welch, 1952; Reid, 1961), the list includes all ponds that were located on Oregon State Highway Department maps.

Many lake basins in central and southeastern Oregon are extinct paleolakes. Others are playa basins, containing water intermittently during the year when precipitation and stream inflow can replenish water lost through evaporation. Both types, if they appeared on Oregon State Highway Department maps, are included in this compilation.

The Warner Valley Lakes in south-central Oregon, which include Fisher, Pelican, Crump, Hart, Anderson, Swamp Lake Jones, Mugwump, Flagstaff, Upper Campbell, Lower Campbell, Stone Corral and Bluejoint Lakes, are remnants of pluvial Lake Warner. Various
authors (e.g., Hutchinson, 1957; Whistler and Lewis, 1916) referred to these collectively as either the Warner Lakes or Warner Lake. Wherever this occurs, the author's bibliographic or reference number (number 73 in the case of Hutchinson, 1957) is assigned to each of the 12 Warner Valley Lakes.

An attempt was made to exclude man-made reservoirs from this compilation. Only natural lakes were considered. However, many reservoirs, especially ones in central southeastern Oregon, are designated as lakes. Several lakes that are listed in this report may actually be reservoirs and should be deleted in a subsequent revision.

Throughout the listing, the term "Lakes" occurs infrequently (e.g., Windy Lakes, Slide Lakes, etc.). Very likely, each of these represents a group of small, closely-associated, nameless lakes that have been incorporated under one name. Nonetheless, each "Lakes" entry is counted as one lake. Consequently, the totals given in Table 1 are approximate and subject to correction.

The status of lakes in Oregon has become of major concern to many state and federal environmental agencies, particularly to those having responsibilities for basic limnological research, water pollution-abatement and water resource management. The apparent need for an updated inventory of Oregon's lakes and literature pertaining thereto justifies the preparation of this compilation.

Considerable effort has been made to present correct and reliable information. Nevertheless, discrepancies are certain to occur. We would greatly appreciate having these brought to our attention. Hopefully, this work will be revised periodically as corrected information, new names and additional references are submitted for compilation.
This work was made possible with funds provided by the U.S. Department of Interior, Office of Water Resources Grant No. 14-31-001-3067. Special thanks go to R. M. Alexander and W. H. Buckley, Water Resources Research Institute, Oregon State University, Corvallis, for their effort in obtaining additional funds to complete the work. We are grateful to W. O. Saltzman, Oregon State Game Commission, Corvallis, and K. N. Phillips, U.S. Geological Survey, Portland, for permitting access to large files of unpublished materials. The information and references contributed by Dr. C. E. Bond, Department of Fisheries and Wildlife, Oregon State University, Dr. H. K. Phinney, Department of Botany, Oregon State University, and R. McHugh, Oregon State Department of Environmental Quality, were much appreciated. We thank C. L. Kissinger, U.S. Forest Service, Portland, Oregon, and J. M. Hutchison, Oregon State Game Commission, Florence, Oregon, for supplying us with xeroxed copies of unpublished reports. Also, we thank R. C. Kavanagh, Department of Fisheries and Wildlife, Oregon State University, for his assistance.
