

Bur Chervil

Scientific name: *Anthriscus scandicina*

Common name: Beaked parsley

By Martin Zimmerman, Sherman County
Extension Agent, Oregon State University

Annual, member of
carrot family

Leaves finely
divided

Stem slender

Taproot slender
(left)

Seed-case bur-like

Bur chervil is found commonly west of the Cascades, located in fencerows, around buildings, and trashy areas.

Control: 1 pound MCPA per acre gives good control in grains and grass fields. Spray in early spring.

This is one of a series of *Fact Sheets* reporting Cooperative Extension work in agriculture and home economics, F. E. Price, director. Printed and distributed in furtherance of Acts of Congress of May 8 and June 30, 1914. Oregon State University, Oregon counties, and U. S. Department of Agriculture cooperating.
