Articles are listed in two ways: by author and by subject. The author index contains an entry for each senior author and listings for co-authors refer back to the senior author. The subject index follows a filing system similar to the Wood Drying Division, FPRS News-Digest. Cross referencing was not used in the subject index.

Each entry includes author, title of paper, a number or letters denoting the meeting at which the paper was presented, page number in proceedings, and total number of pages of the article. An asterisk preceding an entry signifies that the article is not available.

Reprints of an article in the index may be obtained at the rate of 15 cents per page plus postage by contacting Charles J. Kozlik, Western Dry Kiln Clubs, School of Forestry, Oregon State University, Corvallis, Oregon 97331.

Key to Annual Meetings and Other Meetings Pertaining to Lumber Seasoning

1ST Meeting: Southern Oregon-Northern California Seasoning Club, Portland, Oregon. 1948.

3RD Meeting: West Coast Dry Kiln Club, Corvallis, Oregon. 1951.

4TH Meeting: Central California Dry Kiln Club, Redding, California. 1952.

6TH Meeting: Redwood Seasoning Committee, Eureka, California. 1954.

7TH Meeting: Southern Oregon-Northern California Seasoning Club, Klamath Falls, Oregon. 1955.

8TH Meeting: Central California Dry Kiln Club, Berkeley, California. 1956.

9TH Meeting: West Coast Dry Kiln Club, Eugene, Oregon. 1957.

11TH Meeting: Redwood Seasoning Committee, Eureka, California. 1959.

14TH Meeting: Central California Dry Kiln Club, Berkeley, California. 1962.

15TH Meeting: West Coast Dry Kiln Club, Portland, Oregon. 1963.

17TH Meeting: West Coast Dry Kiln Club, Portland, Oregon. 1965.

18TH Meeting: Redwood Seasoning Committee, Eureka, California. 1966.

19TH Meeting: West Coast Dry Kiln Association, Portland, Oregon. 1968.

20TH Meeting: Central California Dry Kiln Club, Redding, California. 1969.

26TH Meeting: Central California Dry Kiln Club, Eureka, California. 1975.

29TH Meeting: Central California Dry Kiln Club, Redding, California. 1978.

SUBJECT INDEX

GENERAL

General

The Scientific Application of Air Drying and Kiln Drying. A. Hermann. 4TH; pp. 3.

These Are Not Easy Times. D. W. Huber. 22ND; p. 32-33; pp. 2.

Kiln Club Activities and Organizations

Broadening Kiln Club Activities. J. B. Grantham. 15TH; p. 6-7; pp. 2.

Dry Kiln Club Procedures. West Coast Dry Kiln Club. 13TH; p. 3; pp. 1.

*Kiln Club Organization and Program - A Professional Assessment. E. E. Gilden. 14TH.

The Relationship Between the Redwood Seasoning Committee and the California Redwood Association. W. E. Pratt. 4TH; pp. 2.

Our Western Dry Kiln Clubs, Past, Present, and Future. E. Knight, 17TH; p. 30-32; pp. 3.

Research at Private and Public Agencies

*California Forest Products Laboratory: Present Program and Plans for Seasoning Research. R. A. Cockrell. 4TH.

Current Drying Research at the Western Forest Products Laboratory. G. Bramhall. 24TH; p. 1-4; pp. 4.

*The Kiln Drying Research Program at the Oregon Forest Products Laboratory. L. D. Espenas. 1ST.

Lumber Drying Research at the California Forest Products Laboratory. F. Dickinson. 8TH; pp. 3.

*Lumber Seasoning Research at the Oregon Forest Products Laboratory. L. D. Espenas. 4TH.

Redwood Seasoning Committee Activities. G. Walter. 22ND; p. 9-10; pp. 2.

*Research of Interest to the Secondary Lumber Industry. F. Dickinson. 10TH.

Western Forest Products Laboratory Industry Services. F. A. Tayelor. 27TH; p. 87-94; pp. 8.

PHYSICAL PROPERTIES OF WOOD RELATED TO DRYING

Drying Stresses

Drying Stresses in Red Oak and Other Hardwoods. J. M. McMillen. 6TH; p. 13-23; pp. 11.

Shrinkage and Swelling

Basic and Applied Research in Wood Drying at the University of Minnesota College of Forestry. R. W. Erickson. 22ND; p. 13-23; pp. 13. (Subjects: prefreezing, incising dimension lumber for drying, and swelling on wood permeability)

Dimensional Stabilization of Wood with Chemicals. B. S. Bryant. 17TH; p. 67-72; pp. 5.

Wood-Moisture Relations and Permeability

Some Facts About Wood that Affect the Rate of Drying. W. J. Delmhorst. 8TH; pp. 3.

Mechanisms of Moisture Movement in Woods. H. D. Erickson. 6TH; p. 7-9; pp. 3.

An Introduction to the Movie--"Mechanism of Moisture Movement in Wood." G. L. Comstock. 16TH; p. 20-21; pp. 2.

Moving Picture: Moisture Movement in Wood During Lumber Drying.
G. Bramhall. 30TH; p. 11-16; pp. 6.

Permeability and Drying Behavior of Western Hemlock. R. T. Lin and C. J. Kozlik. 22ND; p. 44-48; pp. 10.

The Seasonal Variation in Permeability of Softwood. R. A. Hann, L. R. Holzwarth and D. M. Markstrom. 20TH; p. 2-5; pp. 7.

Vapor Pressures Generated in Drying Engelmann Spruce Wood.
D. P. Lowery. 22ND; p. 25-29; pp. 7.

Wood Structure

Drying of California Redwood. B. Peterson. 5TH; pp. 3.

The Influence of Wood Structure. E. Fritz. 6TH; p. 2-6; pp. 4.

*Structure of Wood as it Relates to Drying. W. I. West. 3RD.

Wood Structure as Related to Drying Problems. W. I. West. 7TH; p. 4-9; pp. 6.

**PRESEASONING TREATMENTS**

**Blanking**

Economics of Blanking Prior to Kiln Drying. J. A. Stevens. KDS; Section 11; pp. 4.

**Chemical and Steaming**

The Effect of Pre-Steaming on Stain Control and Drying Rate of Redwood. B. A. Ecklund, W. A. Dost, and W. L. Benjamin. 14TH; p. 77-84; pp. 10.

Treatments to Improve Wood Permeability as an Approach to the Drying Problem. E. L. Ellwood and B. A. Ecklund. 13TH; p. 5-9; pp. 5.

**End Coatings**

End-Check Prevention in Redwood Air Drying. D. Shore. 12TH; p. 14-16; pp. 3.

End Checking Prevention Methods. W. Brubaker. 11TH; pp. 3.

**Pre-Freezing**

Basic and Applied Research in Wood Drying at the University of Minnesota College of Forestry. R. W. Erickson. 22ND; p. 13-23; pp. 13. (Subjects: prefreezing, incising dimension lumber for drying, and swelling on wood permeability)

**Predrying**

High Temperature Predrying of Wood. H. N. Rosen. 29TH; p. 1-10; pp. 11.

Segregating

The Need for Segregation: Drying Mixed Charges. E. Knight. 5TH; pp. 6.

Mechanical Segregation Into Drying Rate Sorts and Computer Controlled Dry Kilns. O. S. Walrath. 27TH; p. 38-47; pp. 10.

AIR DRYING

General

Air Seasoning Around Humboldt Bay. A. F. Peterson. 4TH; pp. 3.

Roof Covers and Pile Foundations

Yard Layout

ACCELERATED AIR DRYING

Air Drying Lumber with Forced Air Circulation. J. R. Pfeiffer. 9TH; p. 35-39; pp. 5.

KILN DRYING

General

Contractual Relations and Obligations of Custom Kiln Operators. G. Wilkinson. 9TH; p. 81-83; pp. 3.

Cutting Kiln Samples From Piled Lumber. H. T. Carsten, Jr. 7TH; p. 56; pp. 1.

*Drying Operations in Southern California. Southern California Lumber Seasoning Association. 5TH.

Practice and Technique of the Drying of Wood in Germany and Europe. R. Hildebrand. 15TH; p. 53-58; pp. 6.

In-Service Moisture Content of Wood. H. E. Troxell. 15TH; p. 59-60; pp. 3.

Moisture Content of Lumber in Use. R. P. Inglis and A. Koehler. 8TH; pp. 4.

*Seasoning and its Effect on Furniture Adhesives. B. Dechter. 10TH.

**SEASONING DEGRADE**

**General and Economics**

Degrade Formation Between the Green Chain and the Dry Kiln. D. W. Huber. 24TH; p. 48-50; pp. 3.

*Degrade vs. Moisture Contents. E. Knight. 3RD.

A Drying and Surfacing Degrade Test Method. G. D. Jamison and K. A. Bassett. 28TH; p. 3-9; pp. 7.

*Kiln Drying and Its Relation to Lumber Degrade. V. Johnson. 2ND.

Poor Stacking, Poor Drying, Poor Storage = Poor Profits. A. L. Hearst, Jr. 25TH; p. 62-64; pp. 3.

Seasoning Defects of Western Softwoods. A. C. Knauss. 7TH; p. 10-18; pp. 9.

Seasoning and Machining Degrade in Eastern Oregon Douglas-Fir, White Fir and Larch. H. D. Stillwell. 8TH; pp. 7.
Seasoning and Machining Degrade in Young-Growth Douglas-Fir Dimension Lumber. B. G. Anderson and A. C. Knauss. 6TH; p. 32-34; pp. 3.

Collapse

*Drying Problems Associated with Collapse in Western Red Cedar. D. P. Thomas. 14TH.

Discolorization and Stain

Effect of Condition and Stain on Export Markets. W. Ross. KDS; Section 7; pp. 2.

The Elimination of Sugar Pine Brown Stain. E. Knight. 11TH; p. 25-30; pp. 6.

Extractives in Redwood: Its Influence on Stain. I. G. Utschig. 5TH; pp. 3.

Warp

Successful Methods of Controlling Cup and Twist at Western Forest Industries Limited. KDS; Section 12; pp. 3.

MOISTURE CONTENT DETERMINATIONS

Automatic Moisture Detection on a Lumber Dry Sorting Chain. J. Hefferline. 8TH; pp. 5.

The Bauer Moisture Content Control. H. Radcliffe. 8TH; pp. 4.

A Computerized Lumber Moisture Content Data Gathering And Analysis System. F. Carlson. 28TH; p. 10-16; pp. 7.

Continuous Automatic Detection of Moisture Content and Sorting of Lumber. J. Hefferline. 4TH; pp. 4.

Are Estimated Shipping Weights Reliable to Determine Moisture Content? L. D. Winkel. 12TH; p. 12-14; pp. 3.

Moisture Content of Lumber Produced From Dead Western White Pine and Lodgepole Pine Trees. D. P. Lowery and A. L. Hearst, Jr. 29TH; p. 61-71; pp. 11.

Moisture Gradient of Lumber in Kilns. L. H. Wood. 8TH; pp. 5.

Moisture Meter for Use in Operating a Lumber Dry Kiln. P. Stebbins. 8TH; pp. 3.

Moisture Meters for Use on Thin Lumber and Veneers. J. R. Barnes. 8TH; pp. 5.

The Moore-Bauer Moisture Content Controller. J. Barrett. 8TH; pp. 2.

One Hundred Percent Check of Moisture Content in Dry Lumber. J. Grist. 8TH; pp. 7.

Using Acceptance Sampling to Check the Moisture Content of Lumber Shipments. J. G. Haygreen. 16TH; p. 16-19; pp. 6.

**LUMBER**

**General**

*Distribution of Lumber in Southern California. J. Forgie. 10TH.

*Glued Laminated Construction. B. Benioff. 10TH.

*Research in Timber Quality and Product Improvement. R. K. Arnold. 14TH.

*Utilization of Lumber in Southern California. E. Flamer. 10TH.

**Species Description**

Description and Display of Woods Dried in the Southern California Area. Southern California Lumber Seasoning Association. 9TH; p. 7-8; pp. 2.

Philippine Woods. Southern California Lumber Seasoning Association. 6TH; p. 36-38; pp. 3.

**Specifications and Standards**

Moisture Content Requirements of the New American Lumber Standards. L. Hickman. 21ST; p. 45-48; pp. 4.

Quality, Condition and End Uses of Lumber in Various Market Areas in Continental Europe. A. A. Vandermeulen. 27TH; p. 79-82; pp. 4.

UNICOM Method of Component Construction and Improved Lumber Size Standards. R. D. McPherson. 16TH; p. 21-24; pp. 4.
WCLIB Presentation on Grade Simplification and Standardization.

PLANING

Coated Abrasive Planing of Rough Kiln Dried Hardwood Lumber.
C. G. Fye. 29TH; p. 72-79; pp. 8.

Effects of Kiln Drying on the Planing of Lumber. D. Macomber.
18TH; p. 89-98; pp. 10.

Relationship of Seasoning to Machining. A. S. Meyers. 10TH; pp. 4.

WASTE UTILIZATION

Our Changing Times with Environment, Ecology and Pollution.
H. J. C. Oster. 22ND; p. 41-43; pp. 3.

A Comparison of Energy Consumption in Different Kiln Drying
Processes With Emphasis on Vapor Recompression. W. Miller.
29TH; p. 88-95; pp. 8.

Determination of Wood Fuel "Price" in Steam Production. W. A.
Dost. 19TH; p. 22-24; pp. 3.

Energy and the Dry Kiln. H. J. C. Oster, Jr. 26TH; p. 16-21;
pp. 6.

Energy from Forest Biomass--Some Potential Benefits and Problems.
R. A. Currier. 30TH; p. 77-83; pp. 7.

Fuel and Steam Boilers. W. Brubaker. 27TH; p. 74-78; pp. 5.

Humidity of Combustion Products From Wood and Gaseous Fuels.
G. Bramhall. 29TH; p. 36-46; pp. 11.

Mill Residues--What Are They Really Worth? W. E. Moore. 26TH;
p. 69-77; pp. 9.

Total Utilization of Mill Waste in Direct Fired Kilns. C. Otway.
24TH; p. 46-47; pp. 2.

Who Says There is an Energy Crisis? D. W. Campbell. 24TH;

Wood Waste Energy Recovery Systems. J. W. Savidge. 23RD; p. 67-
70; pp. 4.
