## 2000 Oregon County and State Agricultural Estimates

Oregon Agricultural Information Network (OAIN)  
Extension Economic Information Office  
Oregon State University

This report is designed to provide a quick overview of Oregon's agriculture for the past year. The following pages report preliminary estimates for the value of sales and agricultural production for the 2000 crop year. Also reported are revised numbers for 1999 and 1998. Preliminary or first estimates are revised as updated information is received by our office. These published estimates are those reported to our office as of March 14, 2001. Estimates are collected and organized through Oregon State University Extension Service personnel. Once county estimates are complete, state totals are tabulated for this special report. Estimates are revised periodically as new information becomes available. These revisions are posted to our Web site noted below.

Farm gate sales or receipts are a traditional measure of economic activity reported for the agricultural industry. Individual commodity categories are subject to interpretation depending upon the refinement of classification. The level of aggregation may shift the apparent ranking of a commodity sector. Aggregating individual grass seed varieties, for example, results in much greater revenues than any single variety. Thus, measure of importance based on gross sales are sensitive to the categorization scheme and level of aggregation.

Rankings are based on the value of gross farm sales. For livestock forages, in particular, the value of sales is significantly less than the value of production, since these forages are produced for on-farm use. Prices used to compute farm gate sales do not include direct government payments.

"Other farm income," particularly *farm forestry* or *small woodlot products*, is included in these agricultural estimates. Farm forestry is a significant contributor to farm income, at \$180.1 million (page 4) in 2000. Caution should be used in comparing these agricultural estimates with the Department of Forestry numbers, as this may lead to the double counting of sales.

Commodity Data Sheets are published throughout the year, reporting major agricultural commodities produced in Oregon. These contain a county level breakdown of production, data on other Northwest states or other states important to the specific commodity, and total figures for the United States. Commodity Data Sheets are published by groupings: grains and hay, field crops, tree fruit and nuts, small fruits and berries, vegetable and truck crops, specialty products, livestock and poultry. For more information contained in the Commodity Data Sheets, contact:

Extension Economic Information Office

<http://ludwig.arec.orst.edu/oain>  
(search under *Commodity Data Sheets*; then under *All Commodity Summaries*)

Thank you to all the county Extension agents and specialists who assisted our office with the development of these estimates for all the crops and livestock throughout Oregon.

A special thank you to Robert Clark of Dixon Creek Software for his programming talents. Mr. Clark provides invaluable assistance in maintaining and improving our Web site.

# AGRICULTURAL COMMODITY SALES

## Oregon, 2000p

### 2000p Sales by Commodity Thousand Dollars

Field Crops	231,912
Grains	140,084
Grass & Legumes	332,976
Hay & Forage	175,568
Nursery & Greenhouse Crops	584,463
Small Fruits & Berries	78,694
Small Woodlots & Christmas Trees	315,292
Other Specialty Products	76,944
Tree Fruits & Nuts	176,957
Vegetables & Truck Crops	270,246
<b>All Crops</b>	<b>\$2,383,136</b>
Cattle & Calves	483,488
Dairy Products	221,277
Other Animal Products	70,535

Other Miscellaneous Livestock	(X)	(X)	18,525
<b>Total livestock &amp; poultry:</b>			<b>\$864,825</b>
<b>Total Agricultural Sales:</b>			<b>\$3,247,961</b>

\*Production and value estimates are aggregated up from individual county data. Livestock such as cattle and sheep may be present in a given county for only some portion of the year. For these commodities, the production and value is based on the value added while the livestock were present in the county, rather than on the number of animals sold.

Calculations may not balance due to rounding. p=preliminary, (X)=not applicable

The Oregon State University Extension Service educates Oregonians by delivering research-based, objective information to help them solve problems, develop leadership, and manage resources wisely.

Extension's agriculture program provides education, training, and technical assistance to people with agriculturally related needs and interests. Major program emphases include food and fiber production, farm business management, marketing and processing of agricultural products, resource use and conservation, and environmental preservation and improvement.

This publication was produced and distributed in furtherance of the Acts of Congress of May 8 and June 30, 1914. Extension work is a cooperative program of Oregon State University, the U.S. Department of Agriculture, and Oregon counties.

Oregon State University Extension Service offers educational programs, activities, and materials—*without regard to race, color, religion, sex, sexual orientation, national origin, age, marital status, disability, and disabled veteran or Vietnam-era veteran status*—as required by Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973. Oregon State University Extension Service is an Equal Opportunity Employer.
