OREGON LANDS

HANDBOOK OF STATISTICS

For use of county agents and others interested
in the land problems of Oregon

By M. N. Nelson, Agricultural Economist
Division of Agricultural Economics
Oregon State College

January 1937

The statistics here given represent a revision of the Handbook of Statistics dated January, 1935. The purpose of this revision has been not only to present data of more recent origin when possible, but also to incorporate the tabular results of a study of types of rural land ownership begun with the aid of Federal funds by the Oregon Agricultural Experiment Station in the fall of 1934.

Supplementing these tables but not incorporated in the handbook are maps on a scale of one inch to the mile covering every county in the State, showing the area devoted to each type of ownership, whether (1) Federal, (2) State, (3) county, (4) municipal, (5) small private or corporate, (6) large private or corporate. These maps are on file and open to inspection in the office of the Division of Agricultural Economics, Oregon State College. For a nominal charge, reprints may be obtained by application to this office. As was stated in the earlier handbook, the statistics here given are the best obtainable but cannot be fully guaranteed as to accuracy. The area of land owned by private individuals, corporations, or public agencies is subject to frequent change. Any tabulation of ownership is therefore of only temporary exactness. The tables included in the following pages present the status of ownership at various periods during the years 1933 to 1936 inclusive, for it was impractical to secure data on all lands for a comparable date. Apparent discrepancies between tables in the area reported for the same class of land is chiefly due to the date to which the data applies. It is believed that the data given are sufficiently accurate to afford a correct picture of the land ownership problem in Oregon.

Grateful acknowledgment is made to E. L. Potter, Head of the Division of Agricultural Economics; A. S. Burrier, Head of the Department of Farm Management; and L. R. Breithaupt, Extension Economist, for their collaboration in this study.

TABLE I

RURAL LAND OWNERSHIP SURVEY, STATE OF OREGON (1)

Classification of all Land According to Type of Ownership
(November, 1934)

Classification	Acreages of each class	Percent each class is of total
All land		
Large private and corporate (2)	5,441,877	8.78
Small private and corporate (3)	21,697,432	35.02
Federal lands	31,891,486	51.47
State lands	1,119,023	1.81
County lands	1,156,550	1.87
Urban municipal lands (4)	172,743	.28
Rural municipal lands	39,067	.06
Miscellaneous lands (5)	440,440	.71
Total All Lands	61,958,618 (6)	100.00

- (1) This table and subsequent tables carrying the title "Rural Land Ownership Survey" embody the results of a land ownership study of Oregon begun in the fall of 1934. It was conducted by the Oregon Agricultural Experiment Station with the aid of funds contributed by the Oregon State Emergency Relief Administration. The data were obtained primarily from the county assessors' offices but were checked and supplemented by statistics obtained from the United States Land Offices in Oregon, the Forest Service, U. S. D. A. and the State Land Board of Oregon.
- (2) Individuals or corporations having a total ownership of 15,000 acres or more in the state other than credit granting institutions.
- (3) Individuals or corporation having a total ownership of less than 15,000 acres in the state.
- (4) All land irrespective of type of ownership, located within the incorporated boundaries of cities, towns, or villages.
- (5) Includes school district land, land undesignated as to ownership, and lakes and/or other bodies of water within the counties.
- (6) The Oregon Blue Book, 1935-36, p. 183, gives area of Oregon as 61,188,480 acres. This figure, however, does not include lake areas.

(2) Act of June 9, 1916 revested in the United States titles to certain lands formerly granted to the Oregon and California Railroad Company. A similar act dated February 26, 1919, reacquired lands formerly granted the Southern Oregon Company as an aid toward the construction of the Coos Bay Wagon Road. All of the above lands are exempt from the provisions of the Taylor Act providing for the establishment of grazing districts. Indemnity lands approximating 500,000 acres, located within the national forest boundaries and not yet classified are omitted from the above.
