

FORESTRY

seems to be available free online with non-pop-up advertisements. OCLC shows there is a sparse number of print copies; only six libraries are shown holding this title worldwide. But the articles are well-written case reports by professionals in the field.

2879. *Forensic Science Communications*. Formerly (until 1999): *Crime Laboratory Digest*. [ISSN: 1528-8005] 1984. s-a. Free. Ed(s): Joseph A DiZinno. U.S. Federal Bureau of Investigation, 935 Pennsylvania Ave NW, Ste 7350, Washington, DC 20535; <http://www.fbi.gov>. Refereed. Circ: 3000. Indexed: SSCI. Aud.: Sa.

This open-access journal began in 1999 and is published by FBI Laboratory personnel, and articles are keyword-indexed on a general government search engine. The articles cover subjects that revolve around the criminological aspects of forensic science, with a difficulty level suited to high school audiences and up; but they are a bit dry and technical.

2880. *Forensic Science International: an international journal dedicated to the applications of genetics in the administration of justice*. Former titles (until vol.13, no.1, 1979): *Forensic Science; Journal of Forensic Medicine*. [ISSN: 0379-0738] 1972. 30x/yr. EUR 2985. Ed(s): P. Saukko. Elsevier Ireland Ltd, Elsevier House, Brookvale Plaza, E. Park, Shannon, Ireland. Illus. Refereed. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; OhioLINK; ScienceDirect; SwetsWise Online Content. Indexed: AbAn, BiolAb, CABA, CJA, CLI, ChemAb, DSA, ExcerptMed, ForAb, H&SSA, HRIS, HortAb, ILP, IndVet, LRI, RRTA, RiskAb, S&F, SCI, SSCI, VB, ZooRec. *Bk. rev.*: 0-3, signed. *Aud.*: Ac, Sa.

One of the earliest journals devoted to forensic science, this was also one of the first available online. It publishes original research papers, literature review articles, book reviews, and case reports that cover all legal aspects of general forensics disciplines. The journal also covers (per the journal's mission statement) "investigations of value to public health in its broadest sense, and the important marginal area where science and medicine interact with the law." A sample article title is "A general approach to Bayesian networks for the interpretation of evidence" (volume 139, issue 1, January 2004). Most articles require a strong medical or science background on the part of the reader, but some will be lay-accessible. One nice feature is the diary, a listing of upcoming professional events.

2881. *International Journal of Legal Medicine*. [ISSN: 1437-1596] 1998. bi-m. Springer, Haber Str 7, Heidelberg, 69126, Germany; orders@springer.de; <http://www.springer.de>. *Aud.*: Ac, Sa

In the late nineteenth century, Germany was the predominant nation doing medical and scientific research, and legal medicine evolved from those origins. Most of the articles in this journal (the online version is reviewed here) relate to medicine or lab techniques, but some are specific to criminology, and all are relevant to criminal forensics to a high degree. A strong medical or science background is recommended for the reader, but the wide variety of (albeit mostly medical) topics recommends this journal for inclusion in a core list of forensics publications. A print version is available but was not selected for review here, since all 17 holding libraries with catalog access through OCLC own only online subscriptions.

2882. *Journal of Forensic Sciences*. Supersedes: *What's New in Forensic Sciences*. [ISSN: 0022-1198] 1956. bi-m. USD 468 print & online eds. Ed(s): Michael A Peat. Wiley-Blackwell Publishing, Inc., Commerce Place, 350 Main St, Malden, MA 02148; customerservices@blackwellpublishing.com; <http://www.blackwellpublishing.com>. Illus., index, adv. Refereed. Circ: 6208. Microform: PQC. Online: EBSCO Host; IngentaConnect; SwetsWise Online Content; Wiley InterScience. Reprint: PSC. Indexed: A&ATA, AbAn, BiolAb, BiolDig, C&ISA, CABA, CJA, CJPI, CLI, CerAb, ChemAb, DSA, ExcerptMed, ForAb, HRIS, HortAb, IAA, ILP, IndVet, LRI, PsycInfo, RILM, RRTA, S&F, SCI, SSCI, VB, ZooRec. *Bk. rev.*: 0-5, signed. *Aud.*: Ac, Sa.

This is another of the journals that began in the 1950s devoted to forensic science. Its contents are subdivided into "Anthropology," "Criminalistics," "Odontology," "Pathology and Biology," "Psychiatry," "Questioned Documents," "Correspondence," "Book Reviews," and "For the Records" (specific medical studies). All articles require a strong medical or professional

criminology background. Sample article title: "Diary of an Astronaut: Examination of the Remains of the Late Israeli Astronaut Colonel Ilan Ramon's Crew Notebook Recovered After the Loss of NASA's Space Shuttle Columbia" (volume 52, issue 3, May 2007).

2883. *Medicine, Science and the Law*. [ISSN: 0025-8024] 1960. q. GBP 85 domestic; GBP 99 foreign. Ed(s): A W Goode. Barnsbury Publishing, PO Box 37389, London, N1 0WE, United Kingdom. Adv. Refereed. Circ: 1600. Indexed: AgeL, CABA, CJA, CLI, ChemAb, ExcerptMed, ForAb, HRIS, ILP, LRI, SCI, SSCI. *Bk. rev.*: 0-2. *Aud.*: Ac, Sa.

This small-format journal is chock-full of a wide variety of readable articles intended to "advance the knowledge of forensic science and medicine," per its home page. Articles explore the interactions between society and medicine, while case studies focus on specific deaths or types of death, and medical techniques or devices. Example articles: "Gender identity disorder and its medico-legal considerations" (volume 47, issue 1, January 2007) and "Medical liabilities of the French physician passenger during a commercial air flight" (volume 47, issue 1, January 2007). A regular feature, "Law and Science," presents short abstracts of specific cases, plus there is an occasional diary that lists upcoming U.K. events. Surprisingly, there is scant online presence for this journal, although some (not all) articles are available full-text via MEDLINE.

2884. *Science and Justice*. Formerly: *Forensic Science Society Journal*. [ISSN: 1355-0306] 1960. q. EUR 216. Ed(s): Niamh Nic Daeid, Robert Forrest. Elsevier Ltd., The Boulevard, Langford Ln, Oxford, OX5 1GB, United Kingdom; JournalsCustomerServiceEMEA@elsevier.com; <http://www.elsevier.com>. Illus., index, adv. Refereed. Circ: 2600. Indexed: CJA, CLI, ChemAb, ExcerptMed, IndVet, LRI, SCI, SSCI, VB. *Bk. rev.*: 0-4, signed. *Aud.*: Sa.

This journal (with the earlier title *Forensic Science Society*) began publishing in 1960, and was another early entry in the roster of journals devoted to forensic science. In 1995, it switched to a larger, glossy format and changed its name to *Science and Justice*. I found this journal to be superlative. It is international in scope, and provides abstracts at the beginning of each article in multiple languages, but English is predominant throughout. It covers topics related to what the public would think of as "forensics" (i.e., criminalistics), but with a large dose of theory and analysis. Compared to other journals in this field, it is a bit thin, in that it has only four to six articles per publication; but the overall high quality of the writing, and the unabashed emphasis on scientific criminology, more than makes up for this. Articles are written in accessible English, but written by scientists, so having a science background is not necessary but may be helpful for the reader. Table of contents and selected articles are available free online.

■ FORESTRY

Bonnie E. Avery, *Forestry and Natural Resources Librarian, Oregon State University Libraries, Room 121, The Valley Library, Corvallis, OR 97331-4501; bonnie.avery@oregonstate.edu*

Introduction

A broad definition of forestry would include the study of trees, forests, and the habitat they provide as well as their use by people. Modern, "science-based" forestry began in the nineteenth century when Europeans looked for specialists who could address questions on wood supply and extraction both at home and in their colonies. The threat of forest loss and wood scarcity created concern for increased forest growth as well as management techniques that would improve yield. By 1891, the United States had established publicly owned forest reserves. In 1900, the Society of American Foresters was established, as was the first School of Forestry in North America at Yale University. The U.S. Forest Service was formed three years later. This combination of professional, scholarly, and governmental resources continues to provide the core of U.S. forestry research today.

Since the mid-1940s, the scope of forestry has grown in response to economics, demography, politics, and social change as well as developments in related fields of study. While at one time German was the primary language of forestry, since World War II most research is reported in English. Knowledge of

international research and practices has grown in importance since the 1980s, particularly as broader trade in forest products influenced the health of forests. In addressing global forest concerns, international and local researchers have begun to “discover” reservoirs of indigenous knowledge concerning native forests and their use.

Modern forestry education has a tradition of integrating concepts from a variety of disciplines and creating new specialties. These include forest genetics, forest ecology, forest recreation, forest economics, forest engineering, urban forestry, plantation forestry, forest pathology, and wood science. The questions addressed by forestry are often interdisciplinary or require a deep understanding of a complementary discipline. As a result, a forest science collection is most useful when it is in close proximity to a sound collection in the natural, environmental, and agricultural sciences. Likewise, users of a wood science or forest engineering collection will rely on access to collections in the physical sciences and civil, mechanical, and chemical engineering.

Finally, to address the interaction of humans and the forest as a multipurpose natural resource, whether looking at income generation, recreational use, traditional knowledge and practices, conservation strategies, or sustainable practices, a forest researcher will need access to collections in the social sciences.

Given these assumptions about access to other collections, we can define a distinct serial literature for forestry. First, it is anchored in the history of forestry and is composed largely of government document series and international and nongovernmental organization report series. In comparison to these, trade, professional, and specialized scholarly journals constitute a highly regarded yet smaller portion of the serial information sources in forestry.

The list of periodicals included here does not include government publications, although these are an important source of technical as well as scientific information. Governmental agencies such as the regional research and experiment stations of the U.S. Forest Service provide vital information on all aspects of forestry. Series titles such as the regional *General Technical Reports* are numerous and now are published electronically and made available on the Forest Service's *TreeSearch* web site. Electronic versions of many Canadian government forestry report series are also available free via the web. In addition, Canadian libraries focusing on forestry will benefit from their access to the National Research Council of Canada's many serial publications.

Although they are important sources of information, statistical series and serials available from nongovernmental, nonprofit international organizations and research institutions have not been included in this listing. Several statistical series and *The State of the World's Forests* are available as searchable datasets and in full text on the Food and Agriculture Organization (FAO) Forestry Sector web site.

There are numerous serial report publications now available via the Internet from other nongovernmental, nonprofit agencies. These are particularly important for coverage of “international forestry.” The FAO Forestry Sector web site will help identify and serve as a portal to many of these resources, as will the “AgNIC Forestry” web site.

This selection of scholarly, academic, and trade journals for forestry is primarily representative and by no means exhaustive. In 2001, faculty members in the College of Forestry at Oregon State University were asked to list their most used or “top ten” journals. This served to provide confirmation of the multidisciplinary underpinnings of forestry. It also provided the core set of scholarly titles for this list to which I have added a few titles in subsequent years. In general when selecting scholarly titles, I look for those with high impact factor rankings or journals with a long citation half-life as provided by the *Journal Citation Reports* from Thomson ISI. When deciding between comparable titles, I considered the journal subscription price, and gave preference to professional society publications over journals from commercial publishers.

I look for titles that reflect changing concerns in forestry. Recent additions to the list of forestry titles include *International Journal of Wildland Fire*, the *Journal of Forest Products Business Research*, and *Small-Scale Forestry*. Monitoring additions to the Directory of Open Access Journals (DOAJ) serves as an inexpensive entree to international society publications and research journals. In addition to *Revista Arvore*, for this edition I have added *BC Journal of Ecosystems and Management* and replaced *Forest@* with *iForest* as strong, representative, open-access publications.

For anyone new to managing a forestry collection, I recommend *Literature of Forestry and Agroforestry*, published by Cornell University Press in 1996. It

provides a useful history of the field and identifies both monographs and serials that have defined “science-based forestry” during the last century. This serves as a good foundation for considering new areas of research and how best to provide a wide array of “evidence-based” forestry information in the future.

Many academic libraries or the institutions they serve are establishing open-access digital repositories as a means of archiving institutional scholarship. To do this requires that authors retain their right to post pre-prints or post-prints of their articles to these repositories. For that reason, I have included information on these “author rights” taken from publisher web sites and from the SHERPA RoMEO web site. These policies can change as publishers merge or take over other imprints. For that reason, I encourage checking the publisher and the SHERPA RoMEO web sites for updates.

This international journal covers meteorology as it is used in the agricultural, forest, and soil sciences. Articles emphasize research relevant to the practical problems of forestry, agriculture, and natural ecosystems. Topics include the effect of weather on forests, soils, crops, water use, and forest fires; the effect of vegetation on climate and weather; and canopy micrometeorology. This journal is heavily used by specialists working in these areas, and as a result it has been assigned a high impact factor by the Institute of Scientific Information. Twenty-four issues appear annually in six volumes, though it is not uncommon for issues to be combined. While this is an expensive journal, a number of thematic, special issues are available for purchase as monographs. Options for online access are available through Science Direct. Authors may self-archive both pre-prints (pre-refereeing) and post-prints (the final draft post-refereeing) on their personal and institutional server. When self-archiving, authors must acknowledge the published source, link to the journal home page, and not use the publisher's pdf version.

2886. *Agroforestry Systems*. Incorporates (1972-1999): *Agroforestry Forum*; Which was formerly (until 1992): *Agroforestry in the UK*. [ISSN: 0167-4366] 1982. 9x/yr. EUR 1253 (print & online eds.). Ed(s): P K Ramachandran Nair. Springer Netherlands, Van Godewijckstraat 30, Dordrecht, 3311 GX, Netherlands; http://www.springer.com. Adv. Refereed. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; OCLC Online Computer Library Center, Inc.; OhioLINK; Springer LINK; SwetsWise Online Content. Reprint: PSC. *Indexed:* Agr, B&AI, BiolAb, CABA, DSA, EnvAb, EnvInd, FPA, ForAb, GardL, HortAb, S&F, SCI, SSCI, SWA, WAE&RSA. *Bk. rev.:* Occasional, 500-1,500 words. *Aud.:* Ac, Sa.

Sponsored in part by the World Agroforestry Center (formerly the International Center for Research in Agroforestry), this is an international, refereed journal. It has grown in reputation during its 20 years of publication and is currently

FORESTRY

highly cited in the research literature. Three volumes are published annually, each consisting of three issues. Included in each issue are seven to ten reports of original research, critical reviews, and short communications, with periodic book reviews and announcements. Topics include basic and applied research on indigenous species and multipurpose trees, and techniques for integrating systems of trees, crops, and livestock. For inclusion, research results and information presented must have application beyond the specific location studied. This journal would complement collections that support agriculture and environmental studies as well as forestry, particularly those with an international development focus. Online access is available via SpringerLink. Subscription information and the table of contents of recent issues are available on the journal web site. Authors may self-archive both pre-prints (pre-refereeing) and post-prints (the final draft post-refereeing) 12 months after publication, on their institutional or funder server. When self-archiving, authors must acknowledge the published source, link to the journal home page, and not use the publisher's pdf version.

2887. American Christmas Tree Journal. Formerly: *American Christmas Tree Growers' Journal*. [ISSN: 0569-3845] 1956. 4x/yr. Non-members, USD 50. Ed(s): Becky Rasmussen, Dennis Tompkins. National Christmas Tree Association, 16020 Swingley Ridge Rd, Ste 300, Chesterfield, MO 63017; info@realchristmastrees.org; http://www.realchristmastrees.org. Illus., index, adv. Circ: 1800. Vol. ends: Oct. Aud.: Ga.

This trade journal is issued four times annually. It serves as the membership journal for the National Christmas Tree Association. Feature articles are of interest to the woodlot owners who grow and market Christmas trees or related products. State chapters of the National Christmas Tree Association report and announce conferences under "Association News." Grower profiles, marketing, business and regulatory information, and silvicultural advice are covered regularly. The White House Christmas tree is featured annually, and articles with a historical perspective on Christmas trees appear regularly. This journal would be useful in general collections where this industry is part of the local economy.

2888. American Forests. Formerly (until 1931): *American Forests and Forest Life*; (until 1924): *American Forestry*; (until 1910): *Conservation*; (until 1908): *Forestry & Irrigation*; Which was formed by the 1902 merger of: *National Irrigation*; (1895-1901): *The Forester*. [ISSN: 0002-8541] 1895. q. Membership, USD 25; USD 3 newsstand/cover per issue. Ed(s): Michelle Robbins. American Forests, 734 15th St, NW, Ste 800, Washington, DC 20005-2000. Illus., index, adv. Circ: 25000 Paid. Vol. ends: Winter. Microform: PQC. Online: EBSCO Host; Florida Center for Library Automation; Gale; Northern Light Technology, Inc.; OCLC Online Computer Library Center, Inc.; ProQuest K-12 Learning Solutions; ProQuest LLC (Ann Arbor); H.W. Wilson. Indexed: ABIIn, Agr, B&AI, BRI, BiolDig, CBRI, ChemAb, EngInd, EnvAb, EnvInd, FPA, ForAb, GSI, GardL, LRI, MASUSE, RGPR. Aud.: Hs, Ga, Ac.

This magazine is the membership organ for one of the oldest conservation organizations in the United States, American Forests. Feature articles are intended for a general audience and address tree planting, tree species profiles, and current policy controversies, as well as the practical aspects of current research and how-to articles. Typical of this magazine's well-illustrated and easily read features are recent articles on the role of urban forests in urban planning and on wildfire recovery efforts in the Southwest. The organization sponsors the work of the "Global ReLeaf Center," "Forest Policy Center," and "Urban Forest Center," and maintains the "National Register of Big Trees." Editorial emphasis is placed on coverage of forests and trees located "on land where people live, work, and relax." Further explanation of sponsored programs and memberships are available on the organization's web site, as is an archive of many of the magazine's articles. This magazine is issued quarterly and would be suitable for public, school, and college libraries.

2889. Arboriculture and Urban Forestry. Formerly (until 2005): *Journal of Arboriculture*; Which was formed by the merger of (1935-1975): *Arborist's News*; *International Shade Tree Conference. Proceedings of the Annual Meeting*. [ISSN: 1935-5297] 1975. bi-m. USD 105. Ed(s): Robert W Miller. International Society of Arboriculture, PO Box 3129,

Champaign, IL 61826-3129; isa@isa-arbor.com; http://www.isa-arbor.com. Illus., index, adv. Sample. Refereed. Circ: 8500. Vol. ends: Nov. Indexed: Agr, B&AI, BiolAb, CABA, FPA, ForAb, GardL, HortAb, RRTA, S&F, WAE&RSA. Aud.: Ac, Sa.

This bimonthly journal (formerly, *Journal of Arboriculture*) is published by the International Society of Arboriculture (ISA). Each issue includes four to six research papers intended for the practitioner, and although scientific in nature, are accessible to the interested layperson. Articles regularly cover such topics as green space, sustainable urban forestry, control of invasive species, landscaping, etc., and would be of interest to urban policymakers as well as urban foresters and park administrators. Of interest to homeowners and gardeners are topics such as street tree inventories, the effect of vegetation on energy use, and topping of trees. Included in each issue is "Arboriculture Abstracts," which summarizes relevant articles in related journals. A complete backfile from 1975 to date is available from "Arboriculture and Urban Forestry On-Line" at joa.isa-arbor.com.

2890. Arborist News. [ISSN: 1542-2399] 1992. bi-m. Membership, USD 105. International Society of Arboriculture, PO Box 3129, Champaign, IL 61826-3129; isa@isa-arbor.com; http://www.isa-arbor.com. Adv. Indexed: GardL. Aud.: Hs, Ga, Ac, Sa.

This bimonthly publication covers news of interest to the tree-care professional and is the membership publication of the International Society of Arboriculture. Regular features include the "Tree Industry Calendar," professional profiles, summaries of articles published in the *Journal of Arboriculture*, the "Climbers Corner," and "European News." Continuing-education articles feature general tree care, current tree-health problems, and business aspects of arboriculture. Selected articles are available in full text on the society's web site, as is membership information needed for subscribing. Articles are timely and readable and would be useful for the general homeowner as well as for the professional arborist. This publication is suitable for a general collection or public library.

2891. B C Journal of Ecosystems and Management. [ISSN: 1488-4666] 2001. 3x/yr. Ed(s): Julie Schooling. FORREX Forest Research Extension Society, 235 1st Ave, Ste 702, Kamloops, BC V2C 3J4, Canada; http://www.forrex.org. Indexed: CABA, FPA, ForAb, HortAb, RRTA, S&F, WAE&RSA, ZooRec. Aud.: Ac, Sa.

This peer-reviewed journal is published by FORREX Forest Research Extension Partnership three times a year. Its mission is to inform readers about innovative approaches to sustainable ecosystem management, and it provides a forum for commentary on current issues and challenges. A modest subscription fee is required for the print edition, while the online version is free to all. This journal is aimed at decision makers in the policy, management, and operations areas, as well as practitioners, professionals, researchers, and natural resource users. Each journal contains research results, indigenous knowledge, management applications, socio-economic analyses, and scholarly opinions. While the emphasis is on applications to British Columbia, articles from the Pacific Northwest states are considered for publication, and certainly articles on species common to the wider region are included. Issues include eight to ten articles categorized as one of the following: editorial comments/perspectives, research reports, discussion papers, popular summaries, and extension notes. Because this is an open-access title, author archiving rights are not a concern.

2892. Canadian Forest Industries: Canada's only national publication serving saw and pulpwood logging, sawmilling and allied activities. Formed by the merger of: *Canada Lumberman*; *Timber of Canada*. [ISSN: 0318-4277] 1888. 8x/yr. CAD 51 domestic; USD 55 United States; CAD 75 elsewhere. Ed(s): Scott Jamieson. J C F T Forest Communications, 90 Morgan Rd, Unit 14, Baie d'Urte, PQ H9Y 3A8, Canada; info@forestcommunications.com; http://www.forestcommunications.com. Illus., index, adv. Sample. Circ: 12500. Vol. ends: Dec. Microform: MML; PQC. Online: CanWest Interactive Inc., FPIInfomart; Micromedia ProQuest. Indexed: CPerI, FPA, ForAb. Aud.: Ac, Sa.

This Canadian trade journal serves as the journal of record for the Canadian Woodlands Forum of the Forest Products Association of Canada (formerly the Canadian Pulp and Paper Association). It focuses on the full range of activities associated with logging technology and harvesting systems. Articles are of

current interest, and editorial features are common and may give this publication broad appeal among those interested in industry practices suitable for North America. Topics such as environmentally sound road building, wood certification, current forest harvesting practices, and tests of new logging equipment are featured regularly and would be of interest to students in forestry or environmental policy. Regular features also include reviews of new products and literature. A sampling of articles from recent issues is available on the journal's web site, as is subscription information for this bimonthly publication.

2893. *Canadian Journal of Forest Research.* [ISSN: 0045-5067] 1970. m. CAD 1185. Ed(s): Cindy E Prescott, Doug Maynard. N R C Research Press, 1200 Montreal Rd, Bldg M-55, Ottawa, ON K1A 0R6, Canada; pubs@nrc-cnrc.gc.ca; <http://pubs.nrc-cnrc.gc.ca>. Illus., index, adv. Sample. Refereed. Circ: 862. Vol. ends: Dec. Microform: MML; PQC. Online: EBSCO Host; Gale; IngentaConnect; Micromedia ProQuest; OCLC Online Computer Library Center, Inc.; Ovid Technologies, Inc.; ProQuest K-12 Learning Solutions; ProQuest LLC (Ann Arbor); SwetsWise Online Content; H.W. Wilson. *Indexed:* Agr, ApEcolAb, B&AI, BiolAb, CABA, CBCARef, CPerI, ChemAb, DSA, EngInd, EnvAb, EnvInd, ExcerptMed, FPA, ForAb, HortAb, IBR, IBZ, M&GPA, PollutAb, RRTA, S&F, SCI, SSCI, SWRA, WAE&RSA, ZooRec. *Aud.:* Ac, Sa.

Consistently in the top ten forestry journal rankings as issued by Institute for Scientific Information, this refereed journal should be a core title for any research collection in this area. It is international in scope, and its articles are in English with French summaries, report on primary research addressing an array of questions, and are accompanied by extensive bibliographies. Each issue is comprised of 15–20 articles, often authored by researchers at universities, government forestry agencies, or other research institutions. Subscription information and tables of contents are available on the web site of the National Research Council of Canada (NRC). After a 12-month period, the full text of articles in the journal are included in Ebsco's Academic Search packages. Access to the full backfile is available for purchase via a package with other NRC publications. The plan is to make the file open-access once digitization costs are covered. A site license for online-only access is available. Authors may self-archive both pre-prints (pre-refereeing) and post-prints (the final draft post-refereeing) on their personal and institutional server provided they have not been amended once accepted for publication. When self-archiving, authors must acknowledge the published source and include the NRC copyright notice. Authors are encouraged to link to the journal's home page and may only post the publisher's pdf version six months after publication.

2894. *Environmental History.* Formed by the merger of (1976-1996): *Environmental History Review*; Which was formerly (until 1989): *Environmental Review*; (1957-1996): *Forest and Conservation History*; Which was formerly (until 1989): *Journal of Forest History*; (until 1974): *Forest History*. [ISSN: 1084-5453] 1996. q. USD 130 (Individuals, USD 55 includes membership). Forest History Society, 701 Williams Vickers Ave, Durham, NC 27701-3162; recluce2@duke.edu; <http://www.foresthistory.org>. Illus., index, adv. Sample. Refereed. Circ: 2000. Vol. ends: Oct. Microform: PQC. Online: EBSCO Host; Northern Light Technology, Inc.; OCLC Online Computer Library Center, Inc.; ProQuest K-12 Learning Solutions; ProQuest LLC (Ann Arbor). Reprint: PSC. *Indexed:* Agr, AmH&L, ArtHuCI, CABA, EnvAb, EnvInd, FPA, ForAb, GardL, HistAb, HortAb, IndVet, PollutAb, RRTA, S&F, SSCI, SWRA, WAE&RSA. *Bk. rev.:* 15-20, 500-1,000 words. *Aud.:* Ga, Ac, Sa.

This refereed journal provides a rich resource for those interested in the history of forestry and environmental studies. Each issue includes four or five well-documented historical articles as well as numerous book reviews. Recent issues include articles on the Forest Service and ecosystem management, urban weed control in the early twentieth century, and a history of oaks in eighteenth- and nineteenth-century Sweden. Books, articles, theses and dissertations, and archival material added to the Forest History Society's database of "sources related to environmental history" are reported with brief annotations in the regular feature, "Biblioscope." This is a significant resource for current awareness for the researcher. Moderately priced and accessible to the general reader with an interest in history, it would be a good addition to larger public libraries, as well as a standard for collections that support both undergraduate

study and graduate research in forestry and environmental studies. Tables of contents, a searchable bibliography, and subscription information are available on the journal's web site.

2895. *Forest Ecology and Management.* [ISSN: 0378-1127] 1977. 24x/yr. EUR 3977. Ed(s): G M J Mohren, R F Fisher. Elsevier BV, Radarweg 29, Amsterdam, 1043 NX, Netherlands; nlinfo-f@elsevier.nl; <http://www.elsevier.nl>. Illus., index, adv. Sample. Refereed. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; OhioLINK; ScienceDirect; SwetsWise Online Content. *Indexed:* Agr, ApEcolAb, B&AI, BiolAb, C&ISA, CABA, CerAb, ChemAb, DSA, EngInd, EnvAb, EnvInd, ExcerptMed, FPA, ForAb, HortAb, IAA, IndVet, M&GPA, PollutAb, RRTA, S&F, SCI, SSCI, SWRA, WAE&RSA, ZooRec. *Aud.:* Ac, Sa.

This refereed journal is perhaps most representative of the multidisciplinary nature of forestry. Each volume consists of 25–45 articles appearing in three issues, although these issues are often combined for publication. There are 15–17 volumes published annually. The journal reports on the "application of biological, ecological and social knowledge to the management of man-made and natural forests." Volumes are often thematic, and typical articles report on research related to tree growth, nutrient cycling, landscape ecology, the forest as habitat, the effect of logging practices, and numerous other subjects. Options for online access are available through Science Direct. The heavy use of this journal by scholars and researchers makes it a core title for research-based forestry collections despite its high cost. Authors may self-archive both pre-prints (pre-refereeing) and post-prints (the final draft post-refereeing) on their personal and institutional server. When self-archiving, authors must acknowledge the published source, link to the journal's home page, and not use the publisher's pdf version.

2896. *Forest Landowner.* Formerly (until 1996): *Forest Farmer*. [ISSN: 1087-9110] 1941. bi-m. USD 55. Ed(s): Paige Cash. Forest Landowners Association, PO Box 450209, Atlanta, GA 31145-0209; info@forestlandowners.com; <http://www.forestlandowners.com>. Illus., adv. Circ: 12733 Paid. Vol. ends: Nov/Dec. *Indexed:* EngInd, EnvAb. *Aud.:* Ga.

This bimonthly publication serves as the membership organ for the Forest Landowners Association and presents issues of concern to large and small timberland owners in the southern and eastern United States. A well-illustrated trade journal, it provides feature articles of political as well as technical interest. Recent issues include articles on seedling mortality, riparian zones, consulting foresters, planning, and research on pest detection for forest health. Feature articles from many issues are available on the association's web site. The association is active in lobbying at the local, regional, and national level, and regular columns include information on timber pricing, timber tax issues, government affairs, and hunting and wildlife, as well as new products and organization news. An annual "Seedling Nursery Directory" appears in the September/October issue, and in alternate years the journal issues "Forest Landowner Manual," a directory of dealers, mills, schools, state and federal agencies, and associations related to forestry in southern and eastern United States. In the geographic regions noted, and where the local economy includes small landowners who privately manage timberlands, this publication would be appropriate for a general library collection.

2897. *Forest Policy and Economics.* [ISSN: 1389-9341] 2000. 8x/yr. EUR 444. Ed(s): M Krott. Elsevier BV, Radarweg 29, Amsterdam, 1043 NX, Netherlands; nlinfo-f@elsevier.nl; <http://www.elsevier.nl>. Refereed. Online: EBSCO Host; Gale; IngentaConnect; OhioLINK; ScienceDirect; SwetsWise Online Content. *Indexed:* Agr, BiolAb, CABA, DSA, EngInd, FPA, ForAb, HortAb, IBR, IBZ, PollutAb, RRTA, S&F, SCI, WAE&RSA. *Aud.:* Ac, Sa.

This refereed journal is issued in collaboration with the European Forest Institute (EFI) and fills a niche in the forestry literature by addressing policy issues in an international context. It covers economics and planning as they apply to the forests and forest industries sector, and it seeks to "enhance communications amongst researchers, legislators, decision-makers, and other professionals concerned with formulating and implementing policies for the sector." Each issue consists of 7–12 articles as well as occasional conference announcements and EFI news. Special thematic issues have covered such topics

FORESTRY

as national forestry programs, multipurpose management of mountain forests, and forest-related rural development. As a moderately priced, scholarly forestry title, it will be an important addition to research collections, but may also be useful for large public library collections where forestry is an important part of the economy. Options for online access are available through Science Direct. Authors may self-archive both pre-prints (pre-refereeing) and post-prints (the final draft post-refereeing) on their personal and institutional server. When self-archiving, authors must acknowledge the published source, link to the journal's home page, and not use the publisher's pdf version.

2898. *Forest Products Journal*. Former titles (until 1955): *Forest Products Research Society. Journal*; (until 1951): *Forest Products Research Society. Proceedings of the National Annual Meeting*. [ISSN: 0015-7473] 1947. 10x/yr. USD 155 domestic; USD 165 in Canada & Mexico; USD 195 elsewhere. Ed(s): Erin Bosch. Forest Products Society, 2801 Marshall Ct, Madison, WI 53705-2295; erin@forestprod.org. Illus., index, adv. Sample. Refereed. Circ: 2000 Paid. Vol. ends: Nov/Dec. Microform: PMC; PQC. Online: EBSCO Host; Florida Center for Library Automation; Gale; Northern Light Technology, Inc.; OCLC Online Computer Library Center, Inc.; ProQuest LLC (Ann Arbor). Indexed: A&ATA, ABIn, Agr, B&AI, CABA, ChemAb, DSA, EngInd, EnvAb, EnvInd, ExcerptMed, FPA, ForAb, HortAb, PollutAb, RRTA, S&F, SCI, SSCI, WAE&RSA. *Bk. rev.*: 0-1, 1,000-2,000 words. *Aud.*: Ac, Sa.

Sponsored by the Forest Products Society, this refereed journal is well respected for its technical coverage of research in wood science and technology. The journal is issued ten times a year. Each includes 10-12 technical articles on an array of topics that include management, processes, solid wood products, composites and manufactured wood products, and fundamental disciplines. To put these articles in perspective, a short statement on the relevance of each article is given under the heading "Practicalities and Possibilities." In addition to association news and classified ads, regular feature columns report on international research literature, new publications and computer applications, patents, codes, standards, and regulatory changes. The featured article from each of the most recent three issues is available in full text on the society's web site. Earlier articles are available to society members only through a user ID and password. This lack of IP recognition access may be a problem for libraries wishing to provide online access to their users. Although this journal is a technical publication, many of its articles would be useful to engineers, economists, and those wishing to keep abreast of the forest products industry.

2899. *Forest Science: a journal of research and technical progress*. [ISSN: 0015-749X] 1955. bi-m. USD 375 (Individuals, USD 130; Members, USD 99 (print & online eds.)). Ed(s): Matthew Walls, Edwin Green. Society of American Foresters, 5400 Grosvenor Ln, Bethesda, MD 20814; johnsonc@safnet.org; http://www.safnet.org. Illus., index, adv. Sample. Refereed. Circ: 1200 Paid. Vol. ends: Dec. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; OCLC Online Computer Library Center, Inc.; ProQuest K-12 Learning Solutions; ProQuest LLC (Ann Arbor). Indexed: Agr, B&AI, BiolAb, CABA, ChemAb, EngInd, EnvAb, EnvInd, ExcerptMed, FPA, ForAb, HortAb, PollutAb, RRTA, S&F, SCI, SSCI, SWRA, WAE&RSA, ZooRec. *Bk. rev.*: 2-3, 1,000 words. *Aud.*: Ac, Sa.

This bimonthly refereed journal is one of five journals sponsored by the Society of American Foresters. Each issue includes 15-25 articles reporting on scientific results from both theoretical and applied research related to silviculture, soils, biometry, disease, recreation, photosynthesis, tree physiology, and all aspects of management and harvesting. International in scope, articles in this journal are both highly cited and consistently cited over a long period of time. It enjoys wide respect within the forestry scientific community and is heavily used by researchers, practitioners, and students alike, who consider this a core title for their work. The general format is open to a wider audience, and articles are readable, making the journal accessible to the general reader as well. Since late 2000, full-text access to articles from this journal is available to subscribers at no additional cost through *ingenta*. There are occasional problems with the timeliness of this online access. A full electronic backset is in process and will be available for an additional fee. Subscription information is available from the society's web site, as is a good deal of other information about the society.

2900. *Forestry Chronicle*. [ISSN: 0015-7546] 1925. bi-m. USD 180, Libraries, CAD 180 (Individuals, CAD 100). Ed(s): Ron Ayling. Canadian Institute of Forestry, 151 Slater St, Ste 606, Ottawa, ON K1P 5H3, Canada; cif@cif-ifc.org; http://www.cif-ifc.org. Illus., index, adv. Sample. Refereed. Circ: 2800. Vol. ends: Nov/Dec. Indexed: Agr, CABA, ChemAb, EngInd, EnvAb, EnvInd, FPA, ForAb, HortAb, IndVet, RRTA, S&F, SCI, SSCI, WAE&RSA, ZooRec. *Bk. rev.*: 1-10, 500-1,500 words. *Aud.*: Ac, Sa.

Published by the Canadian Institute of Forestry, this refereed journal includes both peer-reviewed articles and membership news. Bimonthly issues include 10-15 articles in English and, less frequently, in French with English summaries. In recent issues, the ratio of "Professional Papers" to "Scientific and Technical Papers" is two to one. Papers focus on applied and scientific research and occasionally include conference presentations. Announcements of recent publications, forestry education programs, and professional and institute news are regularly included. Online access to this publication is available with a subscription and includes an archive back to 2002. The intended audience for this journal is the professional forester; however, given its modest price, it is an accessible publication for collections that serve undergraduates and the general public. Authors retain the right to self-archive drafts of their accepted articles on their organizational server provided it is not amended. They may also post the publisher version of their article six months after the electronic publication date. More information is provided on the publisher's web site.

2901. *IAWA Journal*. Former titles (until 1993): *IAWA Bulletin*; *IAWA Publications*. [ISSN: 0928-1541] 1931. q. Free to members. Ed(s): E A Wheeler, P Baas. International Association of Wood Anatomists, PO Box 80102, Utrecht, 3508 TC, Netherlands. Refereed. Circ: 800. Indexed: A&ATA, BiolAb, CABA, FPA, ForAb, HortAb, RRTA, S&F, SCI. *Bk. rev.*: 2-3, 500-1,000 words. *Aud.*: Ac, Sa.

Published by the International Association of Wood Anatomists, this refereed journal covers topics in wood anatomy such as the micro-structure of wood, bark, and related plant products including bamboo, rattan, and palms basic to the study of forest products. It is published quarterly, and each issue is comprised of eight to ten well-documented, illustrated articles on the anatomy and properties of a variety of species, as well as association news, announcements of conferences and workshops, and two or three book reviews. Tables of contents and article abstracts for issues published since 2000 are available on the publisher's web site. For specialized and research collections, this highly cited journal is an important and inexpensive addition.

2902. *iForest: biogeosciences and forestry*. [ISSN: 1971-7458] 2007. q. Free. Societa Italiana di Selvicoltura ed Ecologia Forestale (S I S E F), Dipartimento di Produzione Vegetale, Via dell'Ateneo Lucano 10, Potenza, 85100, Italy; http://www.sisef.it. Refereed. *Aud.*: Ac, Sa.

This peer-reviewed journal is one of a growing number of open-access titles in forestry whose articles are easily found via GoogleScholar. It is sponsored by the Italian Society of Silviculture and Forestry Ecology, which also publishes an Italian counterpart, *Forest@*. The scope of this new title is broad and includes forest ecology, biodiversity and genetics, ecophysiology, silviculture, forest inventory and planning, forest protection and monitoring, forest harvesting, landscape ecology, forest history, and wood technology. Of particular interest is research on sustainable management of forest ecosystems. Although the journal is published in Italy, articles are in English, and include reports of original research, review articles, short communications or brief reporting of research findings, progress reports by individual authors on specific topics, and commentaries on recently published research results. The inaugural issue of this journal contains 15 articles and covers a diverse range of topics, including climate change and insects, remote sensing, fire management, and estimates of carbon stocks, as well as a commentary on the U.S. Forest Service Inventory and Analysis Program. Although it is a research journal, many articles are accessible to the interested novice. As a new title, it is not currently indexed apart from GoogleScholar, although there is little reason to think it will not be indexed in the future. As it is an open-access publication, author rights to self-archive are not an issue.

2903. *International Forestry Review*. Formerly (until 1999): *Commonwealth Forestry Review*. [ISSN: 1465-5489] 1921. q. GBP 180. Ed(s): Alan J Pottinger. Commonwealth Forestry Association, PO Box

142, Oxford, OX26 6ZJ, United Kingdom; <http://cfa-international.org/publications.html>. Illus., adv. Refereed. Circ: 900. *Indexed:* CABA, ChemAb, FPA, ForAb, HortAb, RRTA, S&F, SCI, WAE&RSA. *Bk. rev.:* 5-7, 300-500 words. *Aud.:* Ga, Ac, Sa.

Formerly the *Commonwealth Forestry Review*, this refereed journal is published quarterly by the Commonwealth Forestry Association (CFA). Each issue features 6–12 papers reporting on a wide range of research conducted, for the most part, in Asia and Africa. Also regularly featured are short opinion pieces under the heading “Comment,” five to seven book reviews, and translations of article summaries in French and Spanish. Occasional issues focus on themes such as “Forestry and small island developing states.” One of the goals of CFA is to foster public interest in forestry. For that reason, this modestly priced and well-indexed journal is a good introduction to forestry concerns from an international as well as a scientific point of view. Although online access is available for subscribers, it requires authentication by password. This title would be useful for undergraduate collections that support international programs, and for research collections.

2904. *International Journal of Forest Engineering.* Formerly (until 1999): *Journal of Forest Engineering*. [ISSN: 1494-2119] 1989. s-a. USD 155 domestic; USD 165 in Canada & Mexico; USD 195 elsewhere. Ed(s): Jeremy Rickards. University of New Brunswick, Faculty of Forestry and Environmental Management, PO Box 44555, Fredericton, NB E3B 6C2, Canada; jforeng@unb.ca. Illus. Refereed. Circ: 350 Paid. Vol. ends: Jul. *Indexed:* Agr, CABA, FPA, ForAb, HortAb, S&F, WAE&RSA. *Aud.:* Ac, Sa.

Although articles on forest engineering appear in other forestry journals, this refereed publication sponsored by the faculty of Forestry and Environmental Management at the University of New Brunswick is unique for being devoted to the research aspects of this field. The composition of its editorial board is representative of its international scope. Each issue contains, on average, eight technical papers along with occasional technical notes and reviews. Among topics covered are forest operations including harvesting, stand management, machine design, road design and construction, and wood engineering and processing. The column “Tell us about your organization” may prove useful for librarians wishing to better acquaint themselves with this field. Free full-text access is available for the first ten volumes from the journal’s web site. Online access to subsequent volumes requires a subscriber username and password. Modestly priced, this is an important addition to library collections that support practitioners and researchers in forest operations.

2905. *International Journal of Wildland Fire.* [ISSN: 1049-8001] 1991. bi-m. AUD 1240 (print & online eds.) Individuals, AUD 225 (print & online eds.). Ed(s): Stefan Doerr, Mike Flannigan. C S I R O, 150 Oxford St, PO Box 1139, Collingwood, VIC 3066, Australia; publishing@csiro.au; <http://www.publish.csiro.au/>. Index. Sample. Refereed. Circ: 800 Paid. *Indexed:* Agr, BiolAb, CABA, EnvAb, FPA, ForAb, H&SSA, HortAb, M&GPA, PollutAb, RRTA, RiskAb, S&F, SCI, WAE&RSA. *Aud.:* Ac, Sa.

This peer-reviewed journal is published commercially by the Commonwealth Scientific and International Research Organisation Australia (CSIRO). It is presented under the auspices of the International Association of Wildland Fire and has an editorial board representative of North America, Australia, and Europe. Among the areas covered on a regular basis are fire ecology, fire behavior, and fire management systems, as well as modeling of fire in relation to history, climate, landscape, and ecosystems. The journal is well indexed. The increased and sustained interest in fire management in relation to forested lands makes this publication a desirable addition to both specialized forestry collections and academic collections. Relative to other journals in this field, it is modestly priced. A subscription to the print version includes online access. Online-only access is available at a reduced annual fee, and multi-site licenses are available. Authors retain the right to post a pre-publication of the work on their personal web site or institutional repository or a pre-print server but must also provide a link to the “definitive” version on the publisher’s web site.

2906. *Journal of Forest Products Business Research (Online Edition).*

Formerly (until 2005): *Journal of Forest Products Business Research (Print Edition)*. 2004. irreg. USD 100 (Individuals, USD 50). Ed(s): Eric Hansen. Forest Products Society, 2801 Marshall Ct, Madison, WI 53705-2295; <http://www.forestprod.org>. Refereed. *Aud.:* Ac, Sa.

This electronic journal is currently issued annually with three to ten articles appearing as they are accepted throughout the year. Very modestly priced, it is intended to provide a forum for the publication of scientific research related to forest industry. This is an international journal dedicated to recognition and growth of the academic field of forest products business, particularly management and marketing. Articles may be scientific papers, synthesis papers, or editorials. Access is via a subscriber log-in. URL: www.forestprod.org/jfpbr.html.

2907. *Journal of Forestry.* Formed by the merger of (1902-1916): *Forestry Quarterly*; (1905-1916): *Society of American Foresters. Proceedings*. [ISSN: 0022-1201] 1902. 8x/yr. USD 204 (print & online eds.) Individuals, USD 85; Free to members. Ed(s): Matthew Walls, Keith Moser. Society of American Foresters, 5400 Grosvenor Ln, Bethesda, MD 20814; ziadia@safnet.org; <http://www.safnet.org/pubs>. Illus., index. Sample. Refereed. Circ: 16500 Controlled. Vol. ends: Dec. Microform: PMC; PQC. Online: EBSCO Host; Gale; IngentaConnect; Northern Light Technology, Inc.; OCLC Online Computer Library Center, Inc.; ProQuest K-12 Learning Solutions; ProQuest LLC (Ann Arbor). *Indexed:* Agr, B&AI, BiolDig, CABA, ChemAb, EngInd, EnvAb, EnvInd, ExcerptMed, FPA, ForAb, GardL, HRIS, HortAb, PAIS, PollutAb, RRTA, S&F, SCI, SSCI, SWRA, WAE&RSA, ZooRec. *Bk. rev.:* 5-10, 100 words; 0-1, lengthy. *Aud.:* Hs, Ga, Ac.

This is the membership journal of the Society of American Foresters. Themes for each of eight issues are available on the society’s web site. Current themes include forest health and ecology, international forestry and sustainable development, education and employment, and forest certification and third-party auditing, as well as two open forums and an issue devoted to technology and practice, with an annual “Professional Resource Guide.” Past themes include ethics, GIS, and fire. Feature articles undergo peer review but are written for a broad audience. Regular features include member “Perspectives” and “Focus on,” which features more practical information of interest to members in specific sectors of forestry. Of use to librarians for collection development is the regular column on “New Releases,” which includes books, reports, and media. Both the writing and range of topics covered make this an important addition to public and college libraries as well as collections that serve the professional forester and researcher. Since late 2000, full-text access to articles from this journal is available to subscribers at no additional cost through *ingenta*. An extensive electronic backlog back to 1905 is available. Subscription information is available from the society’s web site, as is a good deal of other information about this professional society.

2908. *Journal of Sustainable Forestry.* [ISSN: 1054-9811] 1993. q. USD 375 print & online eds. Ed(s): Graeme P Berlyn. Haworth Food & Agricultural Products Press, 10 Alice St, Binghamton, NY 13904-1580; getinfo@haworthpress.com; <http://www.haworthpress.com/>. Illus., index, adv. Sample. Refereed. Circ: 152 Paid. Vol. ends: No. 4. Microform: PQC. Online: EBSCO Host; OCLC Online Computer Library Center, Inc.; SwetsWise Online Content. Reprint: HAW; PSC. *Indexed:* AbAn, Agr, BiolDig, CABA, EngInd, EnvAb, EnvInd, FPA, ForAb, GardL, HortAb, IBR, IBZ, PollutAb, RRTA, S&F, SWRA, WAE&RSA. *Bk. rev.:* Occasional, brief. *Aud.:* Ac, Sa.

This international journal is refereed and focuses on research that promotes the sustainability of forests for their products (both wood and non-wood), as well as research that contributes to sustainable agroforestry. It fills a niche in the commercial journal market. Two or more of the four issues that make up each volume may be combined to serve as the record of a conference covering an unusual topic, such as recent issues on “War and Tropical Forests: Conservation in Areas of Armed Conflict,” “Illegal Logging in the Tropics: Strategies for Cutting Crime,” and “Plantations and Protected Areas in Sustainable Forestry.” These multi-issue titles are often made available as monographs as well. It can be argued that more of this material is now available on the web; however, the fact that this journal is well indexed in the bibliographic databases used by students makes it particularly important for academic collections. As of May

FORESTRY

2008, authors retain the right to archive pre-refereed pre-prints and their own copy of the final post-refereed versions to their own or their employer's external web site, provided they acknowledge the publisher's copyright and source. However, these "green" publisher standards may be reduced, as the imprint is now owned by Taylor & Francis.

2909. *National Woodlands Magazine*. [ISSN: 0279-9812] 1979. q. USD 25 domestic includes 8 issues of Woodland Report newsletter; USD 35 foreign includes 8 issues of Woodland Report newsletter. Ed(s): Eric Johnson. National Woodland Owners Association, 374 Maple Ave E Ste 310, Vienna, VA 22180; <http://www.nationalwoodlands.org>. Illus., adv. Circ: 26000 Paid. Vol. ends: Oct. *Aud.*: Ga.

This quarterly magazine serves the membership of the National Woodland Owners Association. This association monitors government activities related to its membership and works with nonprofit groups and professional societies to communicate the concerns and interests of nonindustrial, private woodlot owners. Each issue includes three to five feature articles on such topics as GIS use in pest control, forest ownership patterns, family forestry issues, and environmental education and stewardship programs, as well as regular political news columns and insert reports from both the United States and Canada. Regular departments include "Non-industrial Forestry Commentary," "Conservation News Digest," "National Historic Lookout Register," and updates to the "National Directory of Consulting Foresters." The magazine has a broad geographic focus within the United States and Canada. An inexpensive addition to a general collection, it serves to represent the point of view of the nonindustrial forest landowner. Membership and subscription information is available from the association's web site, as is the full text of issues from July 2002 forward.

2910. *New Forests: journal of biology, biotechnology, and management of afforestation and reforestation*. [ISSN: 0169-4286] 1986. bi-m. EUR 807 (print & online eds.). Ed(s): Stephen W Hallgren. Springer Netherlands, Van Godewijkstraat 30, Dordrecht, 3311 GX, Netherlands; <http://www.springer.com>. Illus., index, adv. Sample. Refereed. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; OCLC Online Computer Library Center, Inc.; OhioLINK; Ovid Technologies, Inc.; Springer LINK; SwetsWise Online Content. Reprint: PSC. *Indexed*: Agr, BiolAb, CABA, DSA, EngInd, EnvAb, EnvInd, FPA, ForAb, HortAb, PollutAb, RRTA, S&F, SCI, WAE&RSA. *Aud.*: Ac, Sa.

This refereed journal is international in scope and is intended for an audience of scientists and practitioners. Two volumes (each comprising three issues) appear annually and contain six to eight papers of reporting on the findings of original research. "New forests" refers to the reproduction of trees and forests by reforestation or afforestation, whether for the purposes of resource protection, timber production, or agroforestry. Topics included are silviculture, plant physiology, genetics, biotechnology, propagation methods and nursery practices, ecology, economics, and forest protection. Although relatively new, it enjoys a good reputation among researchers and should be considered a core title for a research collection. Archival full-text access to issues is available via SpringerLink as an alternative to print or in addition to a print subscription for an additional fee through the publisher's web site. Authors may not self-archive pre-refereed versions of their articles but may post their final drafts (post-refereeing) to their web site, institutional repository, or funder-designated web site/repository. These postings must include specific language about the availability of the publisher's web site location.

2911. *Northern Journal of Applied Forestry*. [ISSN: 0742-6348] 1984. q. USD 170 (Individuals, USD 75). Ed(s): Matthew Walls, James W Hornbeck. Society of American Foresters, 5400 Grosvenor Ln, Bethesda, MD 20814; safweb@safnet.org; <http://www.safnet.org>. Illus., index, adv. Sample. Circ: 2000 Paid. Vol. ends: Dec. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; ProQuest LLC (Ann Arbor). *Indexed*: Agr, BiolAb, CABA, ChemAb, EngInd, EnvAb, EnvInd, FPA, ForAb, HortAb, IndVet, RRTA, S&F, SCI, WAE&RSA, ZooRec. *Aud.*: Ac, Sa.

This is one of three regional applied research journals from the Society of American Foresters. It is targeted toward the professional forester and forest landowner in the northeastern and midwestern United States and Canada and the boreal forests of these areas. Emphasis is on management practices and

techniques. Quarterly issues contain six to ten peer-reviewed articles on such topics as pest and disease control, wildlife management, and harvesting practices, all focusing on practical research to help the practitioner better manage forests of the region. All three regional journals are modest in price and are important for a research and teaching collection. In areas where forests are an important part of the local economy, a general collection would be strengthened with the addition of the geographically appropriate title. Since late 2000, full-text access to articles from this journal has been available to subscribers at no additional cost through *ingenta*. A full electronic backset is in process and will be available for an additional fee. Subscription information is available from the society's web site, as is a good deal of other information about the society.

2912. *Revista Arvore*. [ISSN: 0100-6762] 1977. bi-m. Universidade Federal de Vicosa, Av PH Rolfs s/n, Campus Universitario, Vicosa, 36571-000, Brazil; reitoria@mail.ufv.br; <http://www.ufv.br>. *Indexed*: CABA, DSA, FPA, ForAb, HortAb, RRTA, S&F, WAE&RSA, ZooRec. *Aud.*: Ac, Sa.

This well-indexed technical and scientific journal is published bimonthly by the Sociedade de Investigações Florestais (SIF) in Brazil. It contains original papers in the field of forestry and related research. Among other things, this journal offers a local perspective on issues related to the fate of tropical forests particularly in the Brazilian Amazon. The text of most articles is in Portuguese; however, informative abstracts are available in English. All aspects of forestry are included in the content of this journal. It is typical of the growing number of institutionally based and discipline-specific publications from other countries that are being made available via the Directory of Open Access Journals. For that reason, authors' need to self-archive will be less apparent.

2913. *Small-Scale Forestry*. Formerly (until 2007): *Small-Scale Forest Economics, Management and Policy*. [ISSN: 1873-7617] 2002. q. EUR 341 (print & online eds.). Ed(s): J. Bliss, H. Karppinen. Springer Netherlands, Van Godewijkstraat 30, Dordrecht, 3311 GX, Netherlands; <http://www.springer.com>. Refereed. Circ: 1500. Reprint: PSC. *Indexed*: C&ISA, CerAb, IAA. *Bk. rev.*: 2-3, substantive. *Aud.*: Ga, Ac, Sa.

This peer-reviewed journal began in 2002 as an effort to address the need to disseminate research findings on management of small-scale private forest woodlots within the International Union of Forest Research Organizations (IUFRO). Issues include six to eight articles on topics related to social and economic aspects of private woodlot management and two to three substantive book reviews. With international coverage and a very modest subscription cost, this journal has the potential to be a welcome addition to academic collections. It should also be of use to general collections where management of private woodlots plays a role in the local economy. It is now hosted by SpringerLink, on whose web site the table of contents and abstracts of recent issues can be viewed. If following the default position for Springer, authors retain the right to post both pre-print and post-print drafts of their articles to their personal and/or institutional repository, though they must provide a link to the published version.

2914. *Southern Journal of Applied Forestry*. [ISSN: 0148-4419] 1977. q. USD 170 (Individuals, USD 75). Ed(s): Matthew Walls, Ian A Munn. Society of American Foresters, 5400 Grosvenor Ln, Bethesda, MD 20814; safweb@safnet.org; <http://www.safnet.org>. Illus., index, adv. Sample. Refereed. Circ: 1000 Paid. Vol. ends: Nov. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; ProQuest K-12 Learning Solutions; ProQuest LLC (Ann Arbor). *Indexed*: Agr, BiolAb, CABA, ChemAb, EngInd, EnvAb, FPA, ForAb, HortAb, RRTA, S&F, SCI, SWRA, WAE&RSA, ZooRec. *Aud.*: Ac, Sa.

This is one of three regional, applied-research journals from the Society of American Foresters. It is targeted toward the professional forester and forest landowner in a geographic region ranging from Oklahoma and East Texas east to Virginia and Kentucky. Emphasis is on management practices and techniques in this region where plantation forests are more common. Quarterly issues contain six to ten peer-reviewed articles on such topics as pest and disease control, wildlife management, and harvesting practices, all focusing on practical research to help the practitioner better manage forests of the region. All three regional journals are modest in price and are important for a research and teaching collection. In areas in which forests are an important part of the local economy, a general collection would be strengthened with the addition of the

geographically appropriate title. Since late 2000, full-text access to articles from this journal has been available to subscribers at no additional cost through *ingenta*. A full electronic backset is in process and will be available for an additional fee. Subscription information is available from the society's web site, as is a good deal of other information about the society.

2915. *Tree Physiology: an international botanical journal*. [ISSN: 0829-318X] 1986. m. GBP 1074 (print or online ed.). Ed(s): Rozanne Poulson. Oxford University Press, Great Clarendon St, Oxford, OX2 6DP, United Kingdom; enquiry@oup.co.uk; <http://www.oxfordjournals.org>. Illus., index, adv. Sample. Refereed. Vol. ends: Dec. Online: The Dialog Corporation; EBSCO Host. *Indexed:* Agr, ApEcolAb, BiolAb, CABA, ChemAb, EnvAb, EnvInd, FPA, ForAb, GardL, HortAb, PollutAb, S&F, SCI, SWRA. *Bk. rev.:* 0-3, 300-500 words. *Aud.:* Ac, Sa.

This refereed journal is international in scope and distribution. It is a medium for disseminating theoretical and experimental research results as well as occasional review articles. Each issue consists of eight to ten papers dealing with an array of topics related to tree physiology, including genetics, reproduction, nutrition, and environmental adaptation, as well as those relevant to environmental management, biotechnology, and the economic use of trees. This is an important journal for forest science and botany collections. Online access to the full text of this journal is available at no additional cost to the subscriber. The publisher's web site also provides a cumulative index for downloading. Whether authors retain the right to self-archive pre-prints is unclear. Authors do retain the right to archive a final draft (post-refereeing but pre-publication) of their article on their institutional repository.

2916. *Trees: structure and function*. [ISSN: 0931-1890] 1987. bi-m. EUR 1530 (print & online eds.). Ed(s): Ulrich E Luetge, Robert D Guy. Springer, Tiergartenstr 17, Heidelberg, 69121, Germany. Illus., index, adv. Sample. Refereed. Vol. ends: Sep. Online: EBSCO Host; IngentaConnect; OhioLINK; Springer LINK; SwetsWise Online Content. Reprint: PSC. *Indexed:* Agr, BiolAb, CABA, EngInd, FPA, ForAb, HortAb, RRTA, S&F, SCI, WAE&RSA. *Aud.:* Ac, Sa.

This international, refereed journal is narrowly focused but highly regarded among physiologists in the scholarly community of forestry, horticulture, and botany. Each of its six annual issues includes eight to ten articles on original research in the physiology, biochemistry, functional anatomy, structure, and ecology of trees and woody plants. Review articles are included selectively, as are papers on pathology and technological problems that add to a basic understanding of the structure and function of trees. An online edition of the journal, along with a table-of-contents alerting service, is available on the publisher's web site, Springerlink. Authors may not self-archive pre-refereed versions of their articles but may post the final drafts (post-refereeing) to their web site, institutional repository, or funder-designated web site/repository 12 months after publication. These postings must include specific language about the availability of the publisher's web site location.

2917. *Unasylva: international journal of forestry and forest products*. [ISSN: 0041-6436] 1947. q. USD 50. Food and Agriculture Organization of the United Nations (FAO), Via delle Terme di Caracalla, Rome, 00100, Italy; FAO-HQ@fao.org; <http://www.fao.org>. Illus., index. Sample. Circ: 6500. Vol. ends: Dec. Microform: CIS. *Indexed:* B&AI, BAS, BiolDig, CABA, FPA, ForAb, HortAb, RRTA, S&F, SWA, WAE&RSA. *Bk. rev.:* 2-5, 300 words. *Aud.:* Hs, Ga, Ac.

Available in French, Spanish, and English, this international journal is published by the Food and Agriculture Organization (FAO) of the United Nations to promote better understanding of issues in international forestry. Articles are well illustrated and readable and will have broad appeal to an audience that includes students, policymakers, and professional foresters. Each quarterly issue consists of 8–12 articles that usually address a theme such as perceptions of forests, sustainable forest management, illegal logging, forest-dependent peoples, etc. Regular departments include new books, reports on FAO forestry activities, and news in the "world of forestry." This would be a good addition to general, high school, and college libraries as well as research collections. The full text of articles in each issue of the journal since 1974 is available on the FAO web site. As this is an open-access title, authors' need to self-archive is moot.

2918. *Western Journal of Applied Forestry*. [ISSN: 0885-6095] 1986. q. USD 170 (Individuals, USD 75). Ed(s): Matthew Walls, Robert Deal. Society of American Foresters, 5400 Grosvenor Ln, Bethesda, MD 20814; safweb@safnet.org; <http://www.safnet.org>. Illus., adv. Sample. Refereed. Circ: 2500 Paid. Vol. ends: Oct. Microform: PQC. Online: EBSCO Host; Gale; IngentaConnect; ProQuest LLC (Ann Arbor). *Indexed:* Agr, BiolAb, CABA, DSA, EngInd, EnvAb, FPA, ForAb, HortAb, RRTA, S&F, SCI, WAE&RSA. *Aud.:* Ac, Sa.

This is one of three regional, applied-research journals from the Society of American Foresters. It is targeted toward the professional forester and landowner in western North America. Emphasis is on management practices and techniques. Quarterly issues contain six to ten peer-reviewed articles on such topics as pest and disease control, wildlife management, and harvesting practices, all focusing on practical research to help the practitioner better manage forests of the region. All three regional journals are modest in price and are important for a research and teaching collection. In areas where forests are an important part of the local economy, a general collection would be strengthened with the addition of the geographically appropriate title. Since late 2000, full-text access to articles from this journal has been available to subscribers at no additional cost through *ingenta*. A full electronic backset is in process and will be available for an additional fee. Subscription information is available on the society's web site, as is a good deal of other information about the society.

2919. *Wood and Fiber Science*. Formerly: *Wood and Fiber*. [ISSN: 0735-6161] 1968. q. USD 250. Ed(s): Geza Ifju. Society of Wood Science and Technology, One Gifford Pinchot Dr, Madison, WI 53726-2398; <http://www.swst.org>. Illus., index, adv. Sample. Refereed. Circ: 1000. Vol. ends: Oct. Microform: PQC. *Indexed:* Agr, CABA, ChemAb, EngInd, FPA, ForAb, S&F, SCI, SSCI, WAE&RSA. *Bk. rev.:* 1-3, 400-600 words. *Aud.:* Ac, Sa.

This refereed journal is the product of the Society of Wood Science and Technology (SWST). Typical of the range of subjects covered by the 12–15 articles in each issue are processing testing, modeling applied to oriented strandboard, wood adhesives, moisture movement, use of engineered wood products in Japan, and properties of wood-plastic composites, plus one or two book reviews. This journal is modestly priced and highly regarded by wood scientists and wood technologists. Particularly with the increase in international research coverage, it is also useful for those interested in following new developments in these areas for product marketing. This journal is recommended for comprehensive research collections and for collections needing an economical representative title in this area. For subscribers, the full run of this journal (1968 to date) is available electronically.

Introduction

Gamers come in all shapes, sizes, and ages, and so do the magazines aimed at them. From video and computer gaming to bridge, wargaming, and chess, the magazines represented in this section are very diverse. Some will only be of interest to libraries that serve active gaming communities or clubs, or to libraries currently or considering offering game-based programs.

In addition to the publications listed here, there are multitudes of small niche publications produced by individual game manufacturers aimed at very specific populations. These publications are too specialized or difficult to obtain to be of interest to most libraries. Magazines produced by Nintendo, Sony, and Microsoft to support their gaming systems have not been included here either, but may be of interest to libraries that lend or offer programs using these games.

Most of the magazines reviewed are aimed at the general consumer market, though with the ever-increasing popularity of gaming has come a rise in
