

Past, Present, and Future Stand Treatments and Events

- Early 1900s** The stand was likely clearcut, followed by natural seeding and recruitment of trees.
- 1950s** Some partial cutting
- 1980s** Light thinning on the ridge area in the ITS stand by the Oberteuffers. Some intermittent grazing of horses on property
- 1994** 113 acres transferred to the Oregon State University College of Forestry
- 1995** Salvage harvest of wind-thrown trees, including some light salvage in the ITS stand
- 1996** Permanent inventory plots established
- 2004** Roads improved and rocked
- 2005** Measured inventory plots again in the 50-acre ITS stand
- 2006** First commercial harvest, and measured 50-acre stand again
- 2006–07** Precommercial thinning of thickets of saplings and pole-size trees by private contractor
- 2008** Additional spot precommercial thinning on the west end of stand
- 2011** Measured inventory plots again
- 2011–13** Conducted precommercial thinning where necessary
- 2016** Conduct second commercial harvest
- 2021** Measure inventory plots again
- 2021–22** Conduct third commercial harvest. Conduct precommercial thinning, if necessary
