PREFACE

In 1946 the Oregon State System of Higher Education published a list of graduate theses accepted at the University of Oregon, the University of Oregon Medical School, and Oregon State College during 1932-42, the first decade of the System. The present compilation, prepared by the Oregon State College Library as a contribution to the graduate program of the College, brings this earlier listing up through 1959 for Oregon State College.

The arrangement is alphabetical by subject fields, and under each field chronological by years, in separate sequences for Doctors and Masters theses. Under each year, arrangement is alphabetical by author. An author index refers to each thesis by consecutive citation number. Liberal cross references for subject fields have been used.

All theses here listed have been compiled under the direction, first of Dr. Willibald Weniger, Graduate Dean, 1933-49, and second under Dr. Henry P. Hansen, Graduate Dean since 1949. Comparison of this present listing with the compilation for Oregon State during the 1932-42 period demonstrates dramatically the great increase in the graduate program of the College and particularly the growing number of doctoral dissertations.

The 1932-42 compilation has grown dog-eared and worn in service. We know that this present compilation, which we believe will be somewhat more easily used through its citation indexing and cross referencing, will be even more extensively used. We present it as a significant addition to the Bibliographic Series published by the Library.

William H. Carlson
