Food Supplies

Sectioned drawers are convenient for bulky food materials which can be kept at room temperature.
Movable metal insets are desirable, but those made of plywood may be used if lined with paraffin.

Dimensions of sections holding 10 pounds

Minimum width of section - 5". Permits use of scoop.

Height of partition:
- Running front to back - same as height of drawer
- Lateral - 2" less than height of drawer

Approximate contents of 10# sack:
- Rice - 300 cubic inches
- Dried fruit, salt, beans, steel cut oats - 400 cubic inches
- Hominy, sugar - 500 cubic inches
- Meal - 600 cubic inches
- Flour, wheat flakes - 700 cubic inches
- Rolled oats - 1100 cubic inches

Widths of sections that are 20" long, 8" deep:
- 700 cu. inch capacity - 5" wide
- 1100 cu. inch capacity - 8" wide

Widths of sections that are 10" long, 8" deep:
- 400 cu. inch capacity - 6"
- 700 cu. inch capacity - 10"

Silver Storage

Methods of storing silver

In every day use:
1. Sectioned drawers
2. Drawer or box fitted with container in which each type of article has a separate place.

Used occasionally:
1. In rolls made of flannel treated to prevent tarnish of silver.
2. In box fitted with container in which each type of article has a separate place, and lined with treated flannel.
Sectioned silver drawer

Minimum dimensions:
- Depth 3"; height of dividers between sections, 2"
- Length and width of sections: Units for duplicates hold minimum of 12 pieces each.
  - 4" x 11" - knives
  - 3" x 9" - forks, tablespoons, dessert spoons
  - 3" x 7" - teaspoons, salad forks, bouillon spoons, butter spreaders
  - 3" x 10" to 4" x 13" - single pieces as berry spoon, meat fork, etc.

How to prepare pattern for sectioned silver drawer:
- Draw to scale as many sections as are required for the silver to be stored; cut out drawings.
- Arrange cutouts on a sheet of paper, placing as many of the sections as possible so that their lengths are parallel to edge of drawer. Place knives, forks and teaspoons toward front of drawer.
- Allow six inches at the back of the drawer, for seldom used articles, or as unused space.
- Draw lines to mark outer border and place of partitions.

Fitted silver drawer

How to prepare pattern for fitted silver drawer:
1. Place piece of paper on flat surface. If desired to use a drawer of a particular size, the dimensions of the paper should be those of the inside dimensions of the drawer.
2. Place spoons, forks, and butter spreaders, in piles of six, on this paper, utilizing the space as economically as possible. Allow a section for knives, placed in slits 5/8" apart. If drawer is deep enough (5" or more), knives may be placed in a tray resting on cleats on the sides of the drawer.
3. Draw around each pile of spoons and forks, allowing 1/8" on all sides.
4. Cut out a section extending through the middle, for convenience in picking up piles of forks and spoons.

Construction of fitted drawer:
1. Using pattern prepared as suggested above, cut out from board 1" thick, or from boards totalling 1" in thickness.
2. Glue or nail boards to bottom of silver drawer or to a board the size of the drawer.
3. Cover with treated flannel.
