RUSSIAN WHEAT APHID CONTROL WITH NTN-33893 SEED TREATMENT
R. L. Stoltz
1330 Filer Avenue East, Twin Falls, ID 83301

Spring wheat (Borah) was treated with 125 gm ai/100 kg seed and planted 9 May, 1990. An untreated strip of the same variety was planted next to the treated seed lot. Weekly counts of RWA were initiated 19 June. Good RWA control was realized through 10 July, 60 days after planting.
