This map represents the combined aggregate fishing grounds for the charter and private vessel sectors for Newport. Specifically, the aggregates used were derived from interviews with charter captains and recreational fishermen in Newport, spring 2010. The charter fishing ground aggregates that were combined were Dungeness crab, Pacific halibut, rockfish, and salmon. The private vessel fishing ground aggregates that were combined were Dungeness crab, flatfish, Pacific halibut, rockfish, and salmon. In addition to the combined fishing grounds, percent value contours are also depicted, which illustrate the total value contained within the top 25%, 50%, and 75% respectively. Value is represented as stated importance.
