## Rootstocks at OSU

For the past three years we have been bringing rootstocks into Oregon for inclusion into the OSU Grapevine Mother Block at the Lewis-Brown Farm east of Corvallis. Most of the material has come from the Foundation Plant Materials Service (FPMS) at Davis. The main purpose of the Mother Block is to supply nurseries or growers who want to establish increase blocks of grapes or rootstocks with registered stock Responsibility for the maintenance and distribution of plant material from the Mother Block has recently been shifted from the Department of Horticulture to the Foundation Seed and Plant Materials Program (FSP), an interdepartmental organization administered by the Dean of the OSU College of Agriculture. Growers or nurserymen interested in any of the rootstocks listed below should contact Bev Clark at FSP (754-4032) for information. Rootstocks are also available through FPMS at Davis. Most of the rootstocks mentioned in Lucy Morton's article are at OSU, but many may be in short supply for a few years. A few of the rootstocks mentioned are not at OSU but may be at FPMS.

The following rootstocks are in the OSU Grapevine Mother Block:

Rootstock	Year Planted
ARG 1	1971
SO 4	1971
RUPESTRIS ST. GEORGE	1971
SALT CREEK	1971
FREEDOM	1971
DOG RIDGE	1971
HARMONY	1971
MGT 41B	1984
RICHTER 110	1984
TELEKI 5 BB	1984
RICHTER 99	1984
TELEKI 5 A	1984
COUDERC 1616	1984
FOEX 33 EM	1984
RIPARIA GLOIRE	1988
MGT 101-14	1988
MGT 420 A	1988
COUDERC 3309	1988
