Talk Objectives

Overview of the OH 150 Project

Description of its Technical Workflow

Examination of its Project Portal, including discussion of METS/MODS, TEI and XSL

Discussion of Digital Preservation Activities in support of the project

Assessment of the Portal Workflow

OH 150: Project Overview

Conducted from 2013-2017 in anticipation of OSU's 150th birthday (2018)

The largest oral history project ever conducted at OSU

Interviews with three OSU Presidents and other well-known OSU figures

Broad regional representation, especially through interviews with Extension and Experiment Station staff

Formal launch scheduled for November 2017

OH 150: Project Overview

~400 hours of content

270 total interviews (201 interview sets)

108 Alumni interview sets - nine decades represented

102 Faculty interview sets - each of OSU's colleges represented

22 Staff interview sets

10 Current Student interview sets

3.2 Million words transcribed

1.7 TB born digital

OH 150 Project Details

Topical strengths including:

Athletics

International Studies

Military Service

Multicultural Communities

Public Service

The Advancement of Women

Interviews captured using both video and audio recorders

Video the primary format (.mts raw files)

Audio the backup format (.wav raw files)

These files represent the "stuff" of the archival collection that we are creating.

Interviews processed using Adobe Premiere

Raw .mts files stitched together in Premiere

.mp3 audio derivative created as a transcription/access file

Stored on department file server for staff access

.mpg video derivative created as a low-resolution reference file

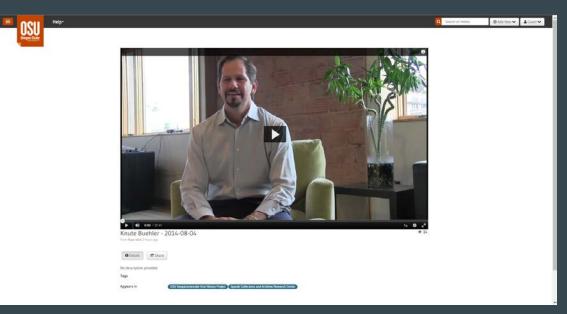

Stored on library preservation server

.m2t video derivative created as high-quality presentation file

Deleted following upload to public space

.m2t presentation derivatives uploaded to OSU MediaSpace (Kaltura instance)

Made immediately available as raw interview video; minimal metadata

Interview described in a dedicated archival finding aid

Printer Friendly

CONTAINER LIST Series 1: Interviews, 2013 Series 2: Interviews, 2014 Series 3: Interviews, 2015 Series 4: Interviews, 2016 Series 5: Interviews, 2017 Oregon State University Sesquicentennial Oral History Collection, 2013-2017

1.1

The Oregon State University Sesquicentennial Oral History Collection documents the history, culture and ambition of Oregon State University through interviews with alumni, faculty, staff, administrators, current students and supporters. Most of the items held in the collection take the form of life history interviews, their sole common thread being an association, past or present, with Oregon State University.

KARYLE BUTCHER ORAL HISTORY INTERVIEW Life history interview conducted by Janice Dilg.

May 8, 2014

Karyle Butcher (b. 1942) was a member of the OSU Libraries faculty from 1981 to her retirement in 2010, serving as University Librarian for the final fourteen years of her career. As director of the OSU Libraries, Butcher oversaw a massive physical expansion of the campus main branch library, promoted a culture of scholarship and innovation within the organization, and guided OSU Libraries to a position of leadership within an information landscape rapidly transitioning from paper to electronic. During Butcher's tenure as Iniversity Librarian, the University Archives and the OSU Press - with Butcher serving as director - also came under the umbrella of the OSU Libraries. Her interview traces her personal evolution as a librarian and as a leader, and also documents the massive changes that ame about during her years of association with the OSU Libraries.

JOHN BYRNE ORAL HISTORY INTERVIEWS

Four life history interviews conducted by Chris Petersen.

January - February 2014

John Byme (b. 1928) has made an indelible impact on Oregon State University through an association that has spanned over five decades. A trained geologist, Byme arrived in Corvallis in 1960 as one of Oregon State College's first faculty members in Oceanography. Over time, Byme assumed chairmanship of the Oceanography Department and later became Dean of OSU's newly ormed School of Oceanography. In 1976 Byrne moved into upper administration, first as Dean of Research and later as Vice Presiden for Research and Graduate Studies. Following a three-year stint in Washington, D.C., where he served as head of the National Oceanic and Atmospheric Administration, Byme returned to Corvallis as the twelfth President in OSU history. Byme's presidency lasted from 1984-1995, a time period during which he did much to modernize university operations amidst a budget crisis caused by significant eductions in state funding for higher education. The Byme oral history interviews trace the arc of his entire life, from his childhood on Long Island to his graduate studies at USC, and on to his tenures at Oregon State and with NOAA.

DARRY CALLAHAN ORAL HISTORY INTERVIEW Life history interview conducted by Mike Dicianna.

Darry Callahan (b. 1942) graduated from OSU in 1964 with a degree in Chemical Engineering and moved directly into a career at Chevron that spanned some forty years. Over the course of that time, Callahan worked as a research engineer, financial analyst, manager and executive. At one time the president of Chevron Oil Bahamas. Callahan also served as the chief executive at Chevron Chemical Company as well as the succeeding company that he helped to merge. Chevron Phillips Chemical. Callahan has also been very actively involved with the OSU Foundation, the OSU College of Engineering, and the OSU Board of Trustees, of which he has been a member and vice chairman since its creation. His interview focuses on his undergraduate years in Corvallis, his long and varied career at Chevron, and his more recent activities with his alma mater.

Guide to the Ralph I. Gifford Photographs, circa 1910s -

Title Ralph I. Gifford Photographs (P 218-SG 2)

1947

Dates

circa 1910s - 1947 (inclusive) 1935-1947 (bulk)

Creator

Gifford, Ralph I.

Summary

The Ralph I. Gifford Photographs consist of images taken by Gifford throughout Oregon, primarily during the 1930s and 1940s. The photographs depict many Oregon landmarks and scenes, including the Oregon Coast, Crater Lake, Mourn Hood, the Wallowa Mountains, and the Snake River Caroyon. The collection includes numerous images of sport fishing as well as several photographs of Native Americans. Ralph Gifford was the son of Benjamin A. Gifford and took over his father's Portland photography business around 1920. In 1936, Ralph became the first photographer of the newly established Tavel and Information Department of the Oregon State Hishway Department, a position held until his death in 1947.

Quantity

2.5 cubic feet, including 2089 photographs (17 boxes, including 2 oversize boxes, and 1 map folder)

Restrictions on Access

Collection is open for research.

Transcript

Janice Dilg: So, today is August 4th, 2014. I'm here with Dr. Knute Buehler at his campaign headquarters in Bend, Oregon. My name is Janice Dilg and this is part of the Oregon State University oral history project. Good afternoon.

Knute Buehler: Good afternoon.

JD: So, I think it seems always kind of fitting to begin a little at the beginning. If you would just talk briefly about where you're from and you're growing up, and perhaps what you were interested in and liked to do in your early years.

Page

KB: Yeah, well I have deep, deep Oregon roots. I grew up in Roseburg, I graduated from Roseburg High, and then from there on to Oregon State, so I have that connection with the state, certainly. So, my decision to go to Oregon State certainly was easy based on that.

JD: And what was it about Oregon State University that attracted you? There are other universities within the borders.

KB: That's right. Well, I think it was that unique combination of a great location in Corvallis—I had a brother who went there, so I felt comfortable at Oregon State, spent quite a bit of time with him, which was really nice of him to show me around when I—because I'm eight years younger than him, so showing your little brother around college is not always the most, the first choice of a big brother, but he was good about that. And then I played baseball at Oregon State, so you know the top-rated baseball program certainly was an attraction, and then high quality academics in the subjects I was interested in, and that was mainly microbiology at that time.

JD: So, you had already developed some fairly specific interests, or just you knew microbiology broadly and would figure it out from there?

KB: Yeah, exactly. So, I knew I liked science, was interested in science, exactly which direction I didn't know, but I had an interest in microbiology from the very beginning, because of—then genetic engineering was just starting and that's really captivated me when I was a high school student.

JD: So, talk briefly about when you arrived in Corvallis on the OSU campus, kind of what was the campus like at that point in time and what were your interactions with some of the professors and the courses that you took?

KB: Well, I remember the first week I got there, because the baseball team actually shows up a couple of weeks before school starts, which is actually quite nice because no one else is around and you kind of have a free run of the place, which was nice to sort things out as a freshman. It also introduced you to upperclassmen on the baseball team who became good advisors and mentors of things to do and things not to do; classes to take and those types of things. And then we quickly transition from the baseball into the dorms, which is always a great experience, so I was on the fourth floor of McNary Hall, which I don't, not sure if McNary is still a dorm anymore, but—

JD: It's actually part of the Honors College.

METS and MODS: Used at OSU for ~15 years

Metadata Encoding and Transmission Standard (METS): Used to encode descriptive, administrative and structural metadata for digital objects

XML schema

Metadata Object Description Schema (MODS): Bibliographic description schema for digital objects

Also an XML schema; analogous to a MARC record for digital objects

In our case, MODS description is nested within METS records

Text Encoding Initiative: A simple xml-based mark-up language used to encode texts

Used at OSU Libraries for many years to prepare texts for presentation on the web.

Also used by OSU Libraries to encode texts for print production.

Easy to learn and well-suited for student work.

<?xml version="1.0" encoding="utf-8"?>

The Oregon State University Sesquicentennial Oral History Project

"From Baltimore to Oxford" August 5, 2015 Location: The Center: Orthopedic and Neurosurgical Care and Research, Bend, Oregon, Watch Video | Download Transcript (PDF) In his second interview, Buehler provides additional details on his experiences in medical school, as a Rhodes Scholar at Oxford, and as a legislator in the Oregon House.

He begins by describing the value that an OSU degree has brought to his life, and then moves on to a description of his medical training at Johns Hopkins University. In this, Buehler touches upon the poverty and social problems that gripped Baltimore during his time there and the impact that they made upon him as a doctor-in-training. He also discusses his contributions to

various community outreach efforts during his tenure at Johns Hopkins, as well as his participation on the medical school's governing council.

The bulk of the session is devoted to Buehler's stint as a Rhodes Scholar at Oxford University. He describes the application process required of potential Rhodes Scholars, including the multiple interviews that he incurred along the way. He also details the significant differences between Oxford's approach to education as compared to his earlier experiences at OSU, and reflects on the far more formal social milieu at Oxford as well.

The interview concludes with Buehler's thoughts on successes that he was a part of during his first session in the Oregon House, his optimism for the development of OSU-Cascades, and his appreciation of OSU as it looks. forward to its sesouicentennial.

<div type="clip" xml:id="event">

Knute Buehler (b. 1964), a native of Roseburg, Oregon, attended Oregon State University from 1982 to 1986, where he played on the baseball team and graduated with a B.S. in Microbiology. Following the completion of his studies at OSU, Buehler was selected as a Rhodes Scholar, the first in OSU history. He completed his Oxford M.A. in Politics and Economics and went on to earn to earn an M.D. from Johns Hopkins University. Buehler now practices as an orthopedic surgeon in Bend, Oregon, and is active in both statewide and national politics. Over two interviews, Buehler discusses on his life at OSU, his experiences at Oxford, his medical training and career, and his interest in politics.

<div type="clip" xml:id="buehler-20140804">

In interview 1, Buehler reflects upon his roots as an Oregonian and his undergraduate experience at Oregon State University. In particular, Buehler discusses his academic experience - including two influential professors - his participation on the OSU baseball team, his hangouts, and campus jobs that he held. From there he notes his time at Johns Hopkins University School of Medicine and his experiences as a Rhodes Scholar at Oxford University.

<The remainder of the session is devoted to Buehler's career in medicine and in public service, his continuing connection with OSU, and advice that he would impart upon college students of today.</p>

:0

<div type="clip" xml:id="buehler-20150805">

In his second interview, Buehler provides additional details on his experiences in medical school, as a Rhodes Scholar at Oxford, and as a legislator in the Oregon House.

He begins by describing the value that an OSU degree has brought to his life, and then moves on to a description of his medical training at Johns Hopkins University. In this, Buehler touches upon the poverty and social problems that gripped Baltimore during his time there and the impact that they made upon him as a doctor-in-training. He also discusses his contributions to various community outreach efforts during his tenure at Johns Hopkins, as well as his participation on the medical school's governing council.

The bulk of the session is devoted to Buehler's stint as a Rhodes Scholar at Oxford University. He describes the application process required of potential Rhodes Scholars, including the multiple interviews that he incurred along the way. He also details the significant differences between Oxford's approach to education as compared to his earlier experiences at OSU, and reflects on the far more formal social milieu at Oxford as well.

<The interview concludes with Buehler's thoughts on successes that he was a part of during his first session in the Oregon House, his optimism for the development of OSU-Cascades, and his appreciation of OSU as it looks forward to its sesquicentennial.

<div type="part" xml:id="buehler-20140804">

Knute Carl Buehler was born in 1964 in Roseburg, Oregon, graduating from Roseburg High School in 1982. That year he began his undergraduate tenure at Oregon State University, majoring in Microbiology and walking on to the baseball team as a pitcher. Buehler completed his B.S. in Microbiology in 1986.

Suchler is the first Rhodes Scholar in OSU history. He attended Oxford University for two years, from 1988-1990, studying Politics and Economics, and completing his M.A. degree. Beginning in 1986, Buehler had also been working on his M.D. at the Johns Hopkins School of Medicine - he completed his doctorate in 1991.

As a professional, Buehler has interned in the Department of Surgery at Oregon Health Sciences University and has also served as a resident in orthopedics at OHSU. He is presently an orthopedic surgeon at the Center for Orthopedic and Neurosurgical Care and Research, located in Bend, Oregon.

Such ler has also been actively involved in both statewide and national politics. An advisor to the 1992 Perot presidential campaign, Buehler helped to organize a successful citizen initiative to reform campaign finance law in Oregon and is also a past party nominee for Oregon Secretary of State. In 2014 Buehler was elected to represent the Bend-area's District 54 in the Oregon House of Representatives.

<hi rend="bold">Janice Dilg:</hi> So, today is August 4th, 2014. I'm here with Dr. Knute Buehler at his campaign headquarters in Bend, Oregon. My name is Janice Dilg and this is part of the Oregon State University oral history project. Good afternoon.

<hi rend="bold">Knute Buehler:</hi> Good afternoon.

<hi rend="bold">JD:</hi> So, I think it seems always kind of fitting to begin a little at the beginning. If you would just talk briefly about where you're from and you're growing up, and perhaps what you were interested in and liked to do in your early years.

<hi rend="bold">KB:</hi> Yeah, well I have deep, deep Oregon roots. I grew up in Roseburg, I graduated from Roseburg High, and then from there on to Oregon State, so I have that connection with the state, certainly. So, my decision to go to Oregon State certainly was easy based on that.

<hi rend="bold">JD:</hi> And what was it about Oregon State University that attracted you? There are other universities within the borders.

0

<hi rend="bold">KB:</hi> That's right. Well, I think it was that unique combination of a great location in Corvallis—I had a brother who went there, so I felt comfortable at Oregon State, spent quite a bit of time with him, which was really nice of him to show me around when I—because I'm eight years younger than him, so showing your little brother around college is not always the most, the first choice of a big brother, but he was good about that. And then I played baseball at Oregon State, so you know the top-rated baseball program certainly was an attraction, and then high quality academics in the subjects I was interested in, and that was mainly microbiology at that time.

<hi rend="bold">JD:</hi> So, you had already developed some fairly specific interests, or just you knew microbiology broadly and would figure it out from there?

<hi rend="bold">KB:</hi> Yeah, exactly. So, I knew I liked science, was interested in science, exactly which direction I didn't know, but I had an interest in microbiology from the very beginning, because of—then genetic engineering was just starting and that's really captivated me when I was a high school student.

<hi rend="bold">JD:</hi> So, talk briefly about when you arrived in Corvallis on the OSU campus, kind of what was the campus like at that point in time and what were your interactions with some of the professors and the courses that you took?

<hi rend="bold">KB:</hi> Well, I remember the first week I got there, because the baseball team actually shows up a couple of weeks before school starts, which is actually quite nice because no one

XSL Transformation/XSL Formatting Objects

Extensible Stylesheet Language (XSL): A family of languages used to transform and render XML documents

XSLT: In this case, a collection of rules that interprets METS and TEI records and, with the help of CSS, creates HTML as its output.

No HTML is ever encoded for any of our projects. All of our HTML is a product of XML, XSL, and CSS.

XSL Transformation/XSL Formatting Objects

XSL-FO: The flavor of XSL used by us to create PDFs.

All PDFs are generated as a result of the batch command line process that we run to generate HTML as well. E.g. -- it all happens at once and all as a result of a single command line process.

XSL is extremely powerful but it requires specialized expertise. This requirement is the <u>biggest hindrance</u> to wider adoption of the OH 150 platform across institutions.

ORAL HISTORY PROJECT

HOME THE INTERVIEWS THE PROJECT

About the Project

The Oregon State University Sesquicentennial Oral History Project is the largest oral history initiative ever conducted at OSU. Sponsored by the OSU Office of the Proved. OSU Marketing and Relation, OSU Libraries and Press (OSULP), the OSU Foundation, the OSU Alumni Office and The Oregon Stater alumni magazine, the project attempts to holistically document the history, impact and ambitions of the university through the recollections of various alumni, faculty, staff, administrators and current students affiliated with OSU. A multi-year initiative, the project is one of many to be sponsored in anticipation of the university's sequicentennial celebration in 2018.

Upon transcription, all interviews are presented on this website and may be browsed through an A.Z. Its or explored by interviewe affiliation or theme. In addition, interview transcripts are presented alongside each video in downloadable PDF format and audio. mp3 files of every session are freely available for download via this link.

Upon transcription, all interviews are presented on this website and may be browsed through an A-Z list or explored by interviewee affiliation or theme. In addition, interview transcripts are presented alongside each video in downloadable PDF format and audio .mp3 files of every session are freely available for download via this link.

- Nearly 400 hours of total interview time and over 3.2 million words of transcription. (In excess of 1.7 terabytes worth of born digit captured as a result of the project.)
- More than 100 interviews with OSU alumni.
- Close to 100 more with OSU faculty, both current and emeritus.
- Another 20 interviews with OSU staff (current and retired) and 10 more with current OSU students (undergraduate and graduate)

In addition

- OSU President Ed Ray gave four interviews for the project, as did President Emeritus John Byrne. President Emeritus Paul Ri less than four months before he passed away in July 2014.
- All of OSU's colleges are represented within the collection, including the Graduate School and the University Honors Colleges campuses: the Haffeld Marine Science Center in Newport and OSU-Cascades in Bend. More than tverty interviews include Experiment Stations as a major theme. Other institutional areas of strength include the OSU Foundation, the Linus Pauling and Press, and OSU Ecampus.
- OSU's Land Grant heritage and mission are documented throughout the project. Specific interviews focusing on Sea Grant, Spa at OSU are included as well.
- The collection features interviews with more than a dozen OSU Distinguished Professors, four members of the OSU Board of co-chairs of the \$1 billion Campaign for OSU: Pat Reser, Jim Rudd and Pat Stone.
- By the numbers, the collections most significant topical strengths include the Advancement of Women, Athletics, Entreprener Sustainability, International Studies, Journalism, Military Service, Multiculturalism, Oceanography and Public Service.
- Within Oregon, project staff traveled to Bend, Hood River, Klamath Falls, Newport, Pendleton and Sutherlin, as well as many loc Willamette Valley, to collect interviews. Outside of the state, interviews were conducted in Denver, Colorado, Houston, Texas, Lo Norman O Klahona, Savatona, California, and Washipaton, D.G.

Preservation

Not great!

So far, following a poor man's LOCKSS (Lots of Copies Keep Stuff Safe) protocol

.mp3 derivative on department file share

.mpg derivative and raw files (.mts and .wav) on library preservation share

Problem: Department and preservation servers are two different RAID arrays physically located right next to each other...

Preservation

Access video provided by OSU MediaSpace

Problem: Likely a third server located in the same room as the above two

All raw files as well as Word transcript files uploaded to Box

Problem: My personal account, so issues there

Print everything out?...considering it...

Hopefully getting better!

Library testing Archivematica as a preservation solution for all of its digital content

·····]]][[······]]].[[······]]][[·····]]].[[·····]]][[·····]]][[·····]]][[·····]]][[·····]]][[·····]]][[·····]]][[····]]][[····]]][[····]]][[····]]][[····]]][[····]]][[····]]][[····]]][[····]]][[····]]][[····]]][[····]][[····]]][[····]]][[····]][[····]]][[····]]][[····]][[····]]][[····]][[····]][[····]]][[····]][[···]]][[···]][[···]]][[···]][[···]]][[···]][[···]]][[···]][[···]]][[···]][[···]][[···]]][[···]][[···]][[···]][[···]][[···]][[···]][[···]][[···]][[···]][[···]][[···]][[··]][[···]][[···]][[···]][[···]][[··]][[··]][[···]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[··]][[·]][[··]][[·]][[··]][[·][[·]][[·]][[·]][[·][[·]][[·]][[·]][[·][[·]][[[]][[·]][[·]][[·]][[[`]][[·]][[·]][[·]][[·]][[·]][[·]][[·]][[·]][[·]][[·]][[·]][[·]][[·]][[`]][[·]][[`]][[

Assessing the OH 150 Platform

Pro

Achieved all of our design objectives

Did so using mostly recycled code

Scalable!

A platform with which we are very experienced and quite comfortable, so efficient locally

Also used for a second smaller oral history project that is currently online

Assessing the OH 150 Platform

Con

Would be at least somewhat difficult to implement elsewhere

METS template is fairly easy to master

TEI encoding is trivial

XSL components are much trickier, though OSU's code could likely be tweaked by someone with rudimentary knowledge of XSL

Requires custom CSS & graphic design from project to project

Requires a media host

The Future of Oral History at

In the process of implementing the Oral History Metadata Synchronizer

> Web-based metadata editor developed at the University of Kentucky

Enables indexing as an alternative to full transcription

OHMS metadata objects exported out of OHMS editor and displayed within a CMS (Omeka, in our case)

Far less flexible or customizable than OH 150, but much more extensible

Urmila Mali Oral History Interview, November 14, 2014

Oregon State University Emilee Boyd, Jessica Tatoya, and Lauren Kimura, Interviewer | OI 118-mail-urmila-20141114 Oregon Multicultural Archives Oral History Collection I

> TRANSCRIPT Search this Transcrip

> > Search

JT: Our names are Jessica Tafoya and Emily Boyd. We are students in Oregon State University's U-Engage class, 'Untold Stories, People of Color in Oregon.' Today's date is November 14th 2014, and we are conducting an oral history interview with Urmila Mali

EB: Please state your name and spell it out loud.

UM: So my name is Urmila Mali, it's U-R-M-I-L-A, and my last name is M-A-L-I.

JT: What is your birthdate and birthplace?

UM: My birthdate is November 3rd, 1969 and birthplace is Kathmandu, Nepal.

EB: With which ethnic or cultural backgrounds do you identify?

UM: So I am-depending on who I'm talking to, so I'll normally say Asian, but my ethnicity is Napoli and my background is Newan, which is my mother tongue as well.

JT: When and where were your parents born, and what are their backgrounds?

1 00 UM: So, my mom and dad both are Newari, they were both born in Kathmandu. Nepal. My dad was born in late '20s, and my mom was born in late '30s.

EB: Where did you grow up and where were you raised?

UM: So, I was born in Nepal, but I was raised in Tillamook, Gregon. So, I moved here in U.S. in 1979 and started school in Tillamook starting 4th grade and graduated from there.

JT: What was your transition from high school to college?

UM: For me the transition was. I was actually looking forward to coming to OSL

Thank You!

<hi rend="bold">Chris Petersen:</hi> Any questions?
