SUBJECT INDEX ............................................................... 335
INTRODUCTION

This is a bibliography of doctoral dissertations and masters’ theses in forestry and related topics issued during the period from July 1981 through June 1990. The colleges and universities included are all accredited by the Society of American Foresters. The actual listings were supplied by the individual institutions. Topics covered have broadened over recent years, reflecting a changing emphasis in curriculum.

The list is arranged first by state, then by institution, then by author’s last name. PhD dissertations are identified by a [PHD] and masters’ theses are noted by an [MS], [MF], etc. An extensive subject index may be found at the back of the volume.

Forestry Theses bibliographies previously published by the Oregon State University Press are mentioned below. They are no longer available for purchase, but may be borrowed from Kerr Library, Oregon State University, through the interlibrary loan process.

- Forestry Theses...1900-1952
- Forestry Theses...1953-1955
- Forestry Theses...1956-June 1966
- Forestry Theses...July 1966-June 1973
- Forestry Theses...July 1973-June 1976
- Forestry Theses...July 1976-June 1981

Bibliographic Series #3
Bibliographic Series #5
Bibliographic Series #13
Bibliographic Series #14
Bibliographic Series #15
Bibliographic Series #19

Many colleges and universities will lend their masters’ theses and PhD dissertations via interlibrary loan. If not, dissertations and some theses may be obtained by purchasing them in microfilm, paperback or hardcover form from University Microfilms Inc., P.O. Box 1764, Ann Arbor, Michigan 48106-1764, USA -- telephone 1-800-521-3042.

The expanding availability of online databases containing records for dissertations and theses may replace the need for future volumes of this series. OCLC Union Catalog online database, available from OCLC, and the online library catalogs of individual institutions, available over the internet, are two examples. On the other hand, not all schools catalog their theses in OCLC, and searching local online library catalogs for theses may be problematic. I would appreciate hearing the views of readers who have opinions concerning the usefulness of future volumes of this series.

ACKNOWLEDGMENTS

The preparation of this volume was a group effort, and several people must be thanked for their help along the way. First and foremost, I would like to thank my colleague, Anita DeWolfe, for her invaluable participation. She input data, thoroughly edited the complete database, and prepared much of the index. Cindy Skinner and Tammy Stevens also contributed many hours inputting data. Bonnie Avery helped in organizing the project and lent her enthusiasm and support. Finally I would like to thank Michael P. Kinch, compiler of several past volumes of this series, for his guidance and support throughout the entire project.
