

**STUDY AREA.**--This is a rough estimate in acres (ac) of the area where observations were made. Areas greater than 1.0 acre will be rounded to the nearest whole acre; areas less than 1.0 acre are listed as <1.

**ELEVATION.**--This is a rough estimate of the range in elevation above sea level where observations were made. +=elevation of at least the number indicated.

**MILES TO COAST.**--This is a rough estimate in miles of the distance between the western edge of the area studied and the Pacific Ocean coastline. This is most pertinent for sites near the Ocean, so sites greater than 20 miles will be just listed as >20. Distances greater than 1.0 mile will be

rounded to the nearest whole mile; distances less than 1.0 mi are listed as <1. +=distance of at least the number indicated.

**LIST AND DEFINITION OF HABITATS.**--Although habitats are easy to define while sitting in an office, they are difficult to use in the field (see J00 No. 1:8-9); for example, sites are often a mixture of habitats. Nevertheless, habitat can be a useful general concept in making rough comparisons among similarly appearing sites. Accordingly, some general habitats used in J00 are defined below; more habitats may be defined in the future. The general habitats given below are meant to be mutually exclusive, but sometimes overlap is unavoidable.

## Index

The following categories are indexed as Separate categories and/or only with each individual Taxon:

Category	Indexed by.....	
	Cat- egory	Person or Taxon
Acknowledgments (people thanked)		X
Albinism	X	X
Box, Nest	X	X
Censuses, Systematic	X	
Cold Weather (Effects of)	X	X
County (of observation)	X	
Cowbird Nest Parasitism	X	X
Feeder, Bird	X	
Food (natural)		X
Frequencies, Monthly (%)	X	
Hybrid	X	X
Migration, Flocks of Passerines	X	X
Migration, Goose		X
Migration, Night	X	X
Migration, Raptor	X	X
Mortality	X	X
Nesting *		X*
Observer		X
Singing/Drumming, Timing of		X
Site (of observation)	X	
Subspecies		X
Weather, Effects of Cold	X	X

\* Nesting only includes records of nests, eggs and or young; mere presence during the species' nesting season is not indexed as Nesting.

Indexed pages include all numbered pages except Appendices.

Unless only casually mentioned, all common names of plants or animals (not just birds) are indexed.

Categories not indexed include scientific names (see Appendix I) and habitats or other site characteristics (see Appendix II).

Gull spp., Scaup spp., Scoter spp., etc. include all indexed pages for their constituent species as well as records not identified to species.

**Note that an indexed item may be cited more than once on each indexed page.**
